|  |                  |
|--|------------------|
| AGREEMENT NUMBER                       | AMENDMENT NUMBER |
| IFB STPD 12-001-B,<br>C3-B-12-10-TS-09 | 1                |
| REGISTRATION NUMBER                    |                  |

1. This Agreement is entered into between the State Agency and Contractor named below:  
 STATE AGENCY'S NAME  
 California Department of Technology  
 CONTRACTOR'S NAME  
 Integra Telecom Holdings, Inc. by and for its wholly owned subsidiary Electric Lightwave LLC – d/b/a Integra

2. The term of this Agreement is 03/26/2014 through 6/30/2018

3. The maximum amount of this agreement after this amendment is: \$0.00

4. The parties mutually agree to this amendment as follows. All actions noted below are by this reference made a part of the Agreement and incorporated herein:

A. This Amendment incorporates the following Changes:  
 Subject CALNET 3, IFB STPD 12-001-B Category 3: Metropolitan Area Network (MAN) Ethernet and Category 5: Managed Internet Services

- Attachment 1 - Revisions to, Category 3, Volume 2, SOW Response to Unique Category Response
- Attachment 2 - Revisions to, Category 3, Volume 3, Cost Information, SOW Catalog A
- Attachment 3 - Revisions to, Category 5, Volume 2, SOW Response to Unique Category Response
- Attachment 4 - Revisions to, Category 5, Volume 3, Cost Information, SOW Catalog A

B. Changes State signature on original STD 213 dated (April 7, 2014)  
 From: Steve Rushing - Statewide Telecommunications and Network Division (STND)  
 To: Barbara Garrett - Statewide Telecommunications and Network Division (STND)

(All other terms and conditions of the original agreement shall remain the same.)

IN WITNESS WHEREOF, this Agreement has been executed by the parties hereto.

## Response to SOW Technical Requirements

### Technical Requirements

#### Category 3 – Metropolitan Area Network ETHERNET

### 3.1 OVERVIEW

This Category 3 IFB provides the State's solicitation for best value solutions for Metropolitan Area Network Ethernet (MAE) services. This IFB describes the CALNET 3 technical requirements necessary to support the CALNET 3 program requirements.

This IFB will be awarded to Bidders that meet the award criteria as described in IFB Section 4. The CALNET 3 Contract(s) that result from the award of this IFB will be managed on a day-to-day basis by the CALNET 3 Contract Management and Oversight (CALNET 3 CMO).

#### 3.1.1 BIDDER RESPONSE REQUIREMENTS

Throughout this IFB, Bidders are required to acknowledge acceptance of the requirements described herein by responding to one (1) of the following:

Example A (for requirements that require confirmation that the Bidder understands and accepts the requirement):

*"Bidder understands the Requirement and shall meet or exceed it? Yes \_\_\_\_\_ No \_\_\_\_\_"*

Or,

Example B (for responses that require the Bidder to provide a description or written response to the requirement):

*"Bidder understands the requirements in Section xxx and shall meet or exceed them? Yes \_\_\_\_\_ No \_\_\_\_\_"*

*Description:"*

#### 3.1.2 DESIGNATION OF REQUIREMENTS

All Technical Requirements specified in this IFB Section are Mandatory and must be responded to as identified in IFB Section 3.4.2.5 by the Bidder. Additionally, some Mandatory requirements are "Mandatory-Scorable" and are designated as "(M-S)". The State will have the option of whether or not to include each item in the Contract, based on the best interest of the State. Furthermore, Customers will have the option whether or not to order services or features included in the Contract. Service Requests for some CALNET 3 services or features may require CALNET 3 CMO approval.

---

 Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet
 

---

Costs associated with services shall be included in the prices provided by the Bidder for the individual items included in the Cost Worksheets. Items not listed in the Cost Worksheets will not be billable by the Contractor. If additional unsolicited items include the features described in the IFB and are not included as billable in the Cost Worksheets, the cost associated with the features shall not be included in the unsolicited price.

Services and features included in the Cost Worksheets are those that the Bidder must provide. All Bidders must provide individual prices as indicated in the Cost Worksheets in the Bidder's Final Proposal. Items submitted with no price will be considered as offered at no cost.

### 3.1.3 PACIFIC TIME ZONE

Unless specific otherwise, all times stated herein are times in the Pacific Time Zone.

## 3.2 ETHERNET SERVICES

Contractors shall provide Ethernet network services in specific geographic locations throughout the state. The service shall provide for the transmission of digital signals in a dedicated high capacity channel. The service shall be available in multiple configurations, enabling Customers to connect two (2) or more Local Area Networks (LANs) at the native speed of the LAN backbone.

### 3.2.1 METROPOLITAN AREA NETWORK ETHERNET (MAE) SERVICES

Contractors shall provide switched Ethernet point-to-point and multipoint LAN services for use in a metropolitan area which allows Customers to connect two (2) or more locations.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

#### 3.2.1.1 General Requirements

##### 3.2.1.1.1 Standards

Contractor's service shall provide Ethernet services that comply with all applicable standards as set by the following standard bodies:

1. Metro Ethernet Forum (MEF);
2. Internet Engineering Task Force;
3. International Telecommunications Union (ITU); and,
4. Institute of Electrical and Electronics Engineers, Inc. (IEEE).

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

##### 3.2.1.1.2 End-to-End Ethernet Delivery

Contractors shall provide a seamless end-to-end service traversing from the Customer Premise Equipment (CPE) through the Contractor's network minimizing conversion of protocols.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.3 Ethernet Virtual Connections (EVC)**

Contractor's service shall provide EVCs, which are used to define the association of two (2) or more User-to-Network Interfaces (UNI's).

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.4 Ethernet User-to-Network Interface (UNI)**

Contractor's service shall provide delivery of the service via a User-to-Network Interface (UNI). The service shall provide bidirectional, full duplex transmission of Ethernet frames using a standard IEEE 802.3 Ethernet interface (UNI). Table 3.2.1.1.4 lists the UNI physical interfaces.

**Table 3.2.1.1.4 – UNI Physical Interfaces**

| UNI Speed | UNI Physical Interface  |
|-----------|-------------------------|
| 10 Mbps   | 10BaseT                 |
| 100 Mbps  | 100BaseT                |
| 1 Gbps    | 1000BaseT or 1000BaseSX |

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.5 Multiple Classes of Service (CoS)**

The service shall provide Class of Service (CoS) options that allow for differentiated service performance levels for different types of network traffic.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.6 Service Frame Delivery Options**

Service Frame Delivery options supported shall include

1. Unicast Frame Delivery;
2. Multicast Frame Delivery as per RFC 11 12; and,
3. Broadcast Frame Delivery as per IEEE 802.3.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.7 Ethernet Service Frame Disposition**

The service shall deliver all service frames associated with the EVC unconditionally across the network as specified in Table 3.2.1.1.7.

**Table 3.2.1.1.7 –Service Frame Delivery Disposition**

| Service Frame Type | Service Frame Delivery               |
|--------------------|--------------------------------------|
| Unicast            | All Frames delivered unconditionally |
| Multicast          | All Frames delivered unconditionally |
| Broadcast          | All Frames delivered unconditionally |

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

#### 3.2.1.1.8 **VLAN Tag Preservation**

The service shall support IEEE 802.1Q VLAN-tagged Customer packets. All Customer VLAN IDs and priority code points (IEEE 802.1p) for CoS shall be transmitted and received unaltered by the service. Untagged packets shall be mapped to the native VLAN specified by Customer. Customers may configure their own VLANs on their Customer owned CPE without coordination with the Contractor.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

#### 3.2.1.1.9 **Maximum Frame Size**

The service shall support a Maximum Transmission Unit (MTU) packet size of 1600 bytes to support untagged or 802.1Q tagged packet sizes.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

#### 3.2.1.1.10 **Performance Monitoring**

The Contractor shall conduct proactive Performance Monitoring that includes the following:

1. Signal failure;
2. Signal degradation;
3. Connectivity or Loss of connectivity;
4. Frame loss;
5. Errored frames;
6. Looping;
7. Mis-inserted frames; and,
8. Maintenance parameters.

**Bidder shall describe their proactive Performance Monitoring (PM) that will be deployed for CALNET 3.**

*Bidder understands the requirements in Section 3.2.1.1.10 and shall meet or exceed them? Yes X No \_\_\_*

*Description:*

*Integra provides a web based customer facing portal to view Service Level Agreement (SLA) performance statistics for all MAE Ethernet Virtual Connections. The portal will also provide a location map depicting a logical map view of the customer's purchased MAE network. The performance monitoring portal will detect signal failure, degradation, loss of connectivity, frame loss, errored frames, and Ethernet MAC loops within the Integra network through the compilation of service statistics. Those statistics include a depiction of usage, one-way and two-way delay, delay variation (jitter), packet loss, and availability. The statistics page provides a 5-min average view of service performance at the UNI and EVC level. Resolution can be adjusted to view performance trends for the last hour or the last 6-months.*

*Looping:*

*Looping generally causes a packet storm which Integra can detect and act on as well as report.*

*Mis-inserted frames:*

*Integra does not insert nor remove frames unless the customer desires to Peer with layer 2 control protocols which is rare.*

*Maintenance activities:*

*Trouble resolution and notification*

*Circuit equipment provides alarm notifications to Integra's Network Notification System (NSS) which filters event data. This data is correlated to Customer circuit IDs, NNS service status, and contact information. The customer profile is maintained in Integra Customer Care (ICC) database.*

*Integra monitors equipment for alarms, cross references TIDs / AIDs (Target Identifier, Access Identifier) to MSS ECKKTs (database circuit information) and determines if the alarming circuit is designated as NNS by referencing the customer profile (ICC). If so, a Trouble Ticket is initiated.*

*The Trouble Management System (TMS) processes the Trouble Ticket created from the Network Monitoring systems and uses the NNS information from ICC to notify the customer via emails and/or SMS messages at key milestones during the life of the Trouble Ticket. Once the Trouble Ticket is cleared, the customer is sent a final update.*

*Scheduled Maintenance Activities*

*Scheduled Maintenance Procedure (SMP) notifications will be managed outside of the "proactive" surveillance process.*

*Communications with customers and internal workgroups will be made to inform each as to the upcoming network maintenance. Work is schedule in a maintenance window of 23:00 PT to 05:00 PT. If a network emergency arises, all proactive notification is best effort and all diligence is used to minimize disruption.*

**3.2.1.1.11 Network Monitoring**

The Contractor shall monitor all services on a 24x365 basis.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.12 Technical Support**

Contractor shall provide technical support service issues via a toll-free telephone number that operates on a 24x365 basis.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.13 Maintenance**

The Contractor shall perform maintenance during a set maintenance window. Maintenance shall be coordinated between the Contractor and the Customer. Contractor shall provide a minimum of 48 hour notice to the Customer for non-service impacting scheduled maintenance. Contractor shall provide a minimum of seven (7) days' notice for service impacting planned maintenance. Emergency maintenance shall be performed as needed.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

**3.2.1.1.14 Equipment and Environment**

The Contractor shall provide and install all network terminating Equipment (NTE) in Customer provided racking and utilize State provided AC power. The NTE shall connect to either a Customer router with an Ethernet blade or a Customer Ethernet switch equipped to support Ethernet located within fifty feet.

All Equipment shall adhere to the Telcordia Network Equipment Building System (NEBS).

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

### 3.2.1.2 Ethernet Private Line (EPL) MAE Service

The Contractor shall provide Ethernet Private Line (EPL) MAE service. This service shall provide a logical Point-to-Point connection between two (2) Customer locations or a Customer location and an Internet Service Provider Point of Presence (POP), Interexchange Carrier POP, or another 3rd party location. EPL service shall enable Customers to use any VLANs or Ethernet control protocol across the service without coordination with the Contractor.

EPL service shall enable Customers to connect their Customer Premise Equipment (CPE) using an Ethernet interface and provide one (1) Ethernet Virtual Connection (EVC) between two (2) Customer locations.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

### 3.2.1.3 Ethernet Virtual Private Line (EVPL) MAE Service

*The Contractor shall provide Ethernet Virtual Private Line (EVPL) MAE service. This service shall provide an Ethernet Virtual Connection (EVC) between two (2) Customer locations similar to Ethernet Private Line service but shall support the added flexibility to multiplex multiple services (EVCs) on a single UNI at a Customer's hub or aggregation site. Bidder understands the Requirement and shall meet or exceed it? Yes  No*

### 3.2.1.4 EPL and EVPL MAE Service Multiplexing

The EPL and EVPL MAE service shall enable Customers to multiplex multiple services (EVCs) on a given UNI eliminating the need for multiple ports on the Customer's router or Ethernet switch.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

### 3.2.1.5 EPL and EVPL MAE Classes of Service (CoS)

Contractor shall provide three (3) Classes of Service (CoS) options for the EPL/EVPL MAE service: BASIC, PRIORITY and PREMIUM. The CoS options shall allow for differentiated service performance levels for different types of network traffic. CoS options shall allow Customers to prioritize mission-critical traffic from lesser priority traffic in the network. The CoS shall be associated with the bandwidth usage rate Committed Information Rate (CIR) ordered by the Customer for each connection at the Customer locations. If the Customer requests multiple EVCs per location, then a CoS will be associated with each EVC.

#### 3.2.1.5.1 **BASIC CoS MAE**

BASIC CoS supports data applications with more tolerance for delay and/or those with least priority. There are no service performance parameters associated with this Class of Service.

**Bidders shall describe in detail their Basic CoS MAE service that will be deployed to satisfy this requirement.**

Bidder understands the requirements in Section 3.2.1.5.1 and shall meet or exceed them? Yes X No \_\_\_

**Description:**

*Integra's Basic CoS MAE marketed as "Best Effort" is the lowest of priority options customers can choose from. In times of congestion, traffic classified by the customer as Best Effort will flow up to the capability of the access providing there is not higher priority traffic that contends for the same resource.*

*When customers choose Basic CoS, Integra assigns no CoS to all incoming traffic on a per EVC or per port basis. All incoming traffic from the customer marked as (802.1p = 0 or DSCP = 0) is encapsulated as Basic CoS with a Priority tag set to (802.1p Value = 0) for transmission across Integra's network.*

*Upon egress from Integra's network this Basic CoS tag is stripped before transmission back to the customer's network. The customer's traffic is not altered in any way.*

*Basic CoS treatment is used for applications that have no guarantee requirements whose associated traffic flows are tolerable of delay and jitter. These traffic flows are the lowest priority when compared to more critical applications that require more stringent SLAs.*

*Applications that might fit into this category would be general web browsing and other low priority data transmission.*

**3.2.1.5.2 PRIORITY CoS MAE**

PRIORITY CoS shall support data applications with more tolerance for delay and/or those that are lower in priority. The service parameters associated with this class of service are listed in Table 3.2.1.5.2.

Table 3.2.1.5.2 lists the service performance objectives for PRIORITY CoS for distances within 250 network miles.

**Table 3.2.1.5.2 – PRIORITY CoS Performance Objectives**

| Performance Objective ( $\leq$ 250 miles) | PRIORITY CoS |
|---|--------------|
| Latency (one way)                         | <35ms        |
| Jitter (one way)                          | <40ms        |
| Packet Loss (one way)                     | <0.5%        |
| Availability                              | >99.99%      |

**Bidders shall describe in detail their Priority CoS MAE service that will be deployed to satisfy this requirement.**

*Bidder understands the requirements in Section 3.2.1.5.2 and shall meet or exceed them? Yes X No \_\_\_*

*Description:*

*Integra's Priority CoS MAE is marketed as "Business Class" and provides data prioritization for very important data applications that are of a high priority and involve business transactions.*

*Integra's Priority CoS is the 2nd highest of three priority options customers can choose from. In times of congestion, traffic treated as Priority CoS will take precedent over Best Effort and Basic CoS traffic. This Business Class CoS prioritizes any data frame with a CoS pBit of "4" that is sensitive to latency.*

*When customers choose Priority CoS, "Business Class", Integra assigns this CoS to all incoming traffic on a per EVC or per port basis. All incoming traffic from the customer marked as (802.1p = 2,3,4 or DSCP = CS2,CS3,CS4,AF2x,AF3x,AF4x) is encapsulated within a Priority tag (802.1p Value = 4) for transmission across Integra's network.*

*Note: Mapping of customer Priority CoS, traffic to Integra "Business Class" traffic is customizable. The mapping above is the default. More customized mapping can be supported.*

*Upon egress from Integra's network this Priority tag is stripped before transmission back to the customer's network. The customer's traffic is not altered in any way.*

*Priority CoS treatment is used for applications that have moderate to high guarantee requirements whose associated traffic flows are defined locally by the customer as critical.*

*These traffic flows are of moderately high priority when compared to more critical applications that are typically real-time in nature.*

*Applications that might fit into this category would be client-server applications, interactive messaging and transactional data. Mission critical data and video streaming might also fit into this category.*

### **3.2.1.5.3 PREMIUM CoS MAE**

PREMIUM CoS shall support applications that require minimal loss and low latency variation (i.e., jitter). The network will provision data in this class of service in a priority queue indicating that it is delay sensitive. The service parameters associated with this class of service are listed in Table 3.2.1.5.3.

Table 3.2.1.5.3 lists the service performance objectives for PREMIUM CoS for distances within 250 network miles.

**Table 3.2.1.5.3 – Class of Service Options**

| Performance Objective<br>(≤ 250 miles) | PREMIUM CoS |
|--|-------------|
| Latency (one way)                      | <25ms       |
| Jitter (one way)                       | <25ms       |
| Packet Loss (one way)                  | <0.1%       |
| Availability                           | >99.99%     |

**Bidders shall describe in detail their Premium CoS MAE service that will be deployed to satisfy this requirement.**

*Bidder understands the requirements in Section 3.2.1.5.3 and shall meet or exceed them? Yes X No \_\_\_*

*Description:*

*Integra's Premium CoS is marketed as "Real Time" and is the highest of three priority options customers can choose from. In times of congestion, traffic treated as Premium CoS will take precedent over all other traffic flows.*

*When customers choose Premium CoS, "Real Time", Integra assigns this CoS to all incoming traffic on a per EVC or per port basis. All incoming traffic from the customer marked as (802.1p = 5,6,7 or DSCP = CS5,CS6,CS7,EF) is encapsulated within a Premium tag (802.1p Value = 5) for transmission across Integra's network.*

*Note: Mapping of customer Premium CoS, traffic to Integra "Real Time" traffic is customizable. The mapping above is the default. More customized mapping can be supported.*

*Upon egress from Integra's network this Premium tag is stripped before transmission back to the customer's network. The customer's traffic is not altered in any way.*

*Premium CoS treatment is used for applications that have the highest guarantee requirements and that are very sensitive to delay and jitter. These traffic flows are of the highest priority when compared to all other applications.*

*Applications that fit into this category are typically voice-bearing like VoIP or interactive video.*

### **3.2.1.6 EPL and EVPL MAE Service Feature Description**

Contractor shall provide MAE services as described below.

**3.2.1.6.1 EPL and EVPL MAE Service Connections**

EPL and EVPL MAE Service Connections shall include the Network Interface and the Access Link from the Customer premises to the Ethernet network, a port on the Ethernet network, the assigned bandwidth usage and one (1) Ethernet Virtual Connection (EVC).

1. Network Interface (NI): The point that the Customer's data transmission enters the network. The point of interconnection between the Contractor's communication facility and your end-user's terminal equipment.
2. Access Link: Connects a Customer facility at the NI to an Ethernet port on the Metro Ethernet network with a standard optical or copper connection.
3. Port: An Ethernet port is the physical entry point to the shared Metro Ethernet Network. Virtual Local Area Networks (VLANs) Ethernet Virtual Connections (EVCs) originate and terminate on a Metro Ethernet Port.

**3.2.1.6.2 Managed Router Service:**

Contractor shall offer a managed router service that includes the components described in Section 3.2.1.6.1 in a bundled format which includes a Contractor owned, maintained and managed router as identified in Table 3.2.1.6.a.

The Contractor's managed router service shall include proactive Customer notification.

**Bidder shall describe in detail all equipment, maintenance and management services that, as the awarded Contractor, will be deployed to satisfy this requirement.**

*Bidder understands the requirements in Section 3.2.1.6.2 and shall meet or exceed them? Yes X No \_\_\_\_\_*

*Description:*

*Integra will supply a router for each circuit that is ordered with a managed router. The physical CPE provided will have the following characteristics:*

## Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet

| <b>Table 3.2.1.6.2 – Managed Router Service Characteristics</b> |                    |                                 |   |   |                                      |
|---|--------------------|---------------------------------|---|---|--------------------------------------|
| <b>Access Type</b>  | <b>Bandwidth</b>   | <b>Access Interface</b>         | <b>Customers Interface (NI)</b>                             | <b>CPU throughput</b>                         | <b>RAM</b>                           |
| <b>T1</b>   | 128 to 1.544mbs    | 1xT1                            | 10/100/1000base-T   | 30 Mbs  | Amount to support all routing tables |
| <b>(2) T1 to (8) T1</b>   | 3.088 to 12.352mbs | 2-8xT1                          | 10/100/1000base-T   | 30 Mbs  | Amount to support all routing tables |
| <b>DS3</b>  | 15 to 45mb         | DS3                             | 10/100/1000base-T   | 90 Mbs  | Amount to support all routing tables |
| <b>Ethernet</b>   | 10 to 100mb        | 10/100/1000base-T               | 10/100/1000base-T   | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>Ethernet</b>   | 101 to 1000mb      | 10/100/1000base-T               | 10/100/1000base-T   | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>Ethernet</b>   | 1001 to 10,000mb   | 10/100/1000base-T or 10GBASE-xx | 10/100/1000base-T or 10GBASE-xx                             | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>  | 155mbs             | OC-3 SONET                      | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>  | 620mbs             | OC-12 SONET                     | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>  | 2480mbs            | OC-48 SONET                     | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |

*Each router will have a modem installed and attached to an analog telephone line for an alternate remote access. The routers will be configured by Integra operations staff and will be monitored on a continual bases. Integra will manage, maintain, configure, archive and upgrade a managed router as part of the service. The router remains the property of Integra*

Contractors shall provide the services and Features described in Table 3.2.1.6.a

**Table 3.2.1.6.a-MAE Services and Features**

Input traffic on an EVC exceeding these CIR profiles is subject to discard.</i></p> <p><i>Premium CIR is defined on the Integra network as Ethernet frames with a pBit identifier of 5, or Real-Time Class of Service (CoS).</i></p> |  |                          |   |                             |

The Contractor may offer additional unsolicited MAE services and features in Table 3.2.1.6.b.

**Table 3.2.1.6.b – Unsolicited MAE Services and Features**

|   | Feature Name   | Feature Description  | Bidder's Product Identifier |
|---|--|--|-----------------------------|
| 1 | <i>Standard CoS MAE (EP-LAN)</i>   | <i>Standard CoS supports data applications with less tolerance for delay than those with least priority. There are service performance parameters associated with this Class of Service.</i> | 301614                      |
|   | <p>Bidder's Product Description:</p> <p><i>Integra's "Standard Class" is a service between Basic and Priority CoS and provides data prioritization for important data applications that are of higher priority than basic web browsing, e-mail traffic or other non-essential traffic.</i></p> <p><i>This "Standard Class" CoS prioritizes any data with a CoS pBit set to "1" that is somewhat sensitive to latency. All other traffic that has the CoS pBit set to "0" is managed as "Best Effort" to the level of bandwidth purchased.</i></p> <p><i>Upon egress from Integra's network this Standard Class CoS tag is stripped before transmission back to the customer's network. The customer's traffic is not altered in any way.</i></p> <p><i>Standard CoS treatment is used for applications that have moderate guarantee requirements whose associated traffic flows somewhat tolerable of delay and jitter. These traffic flows are the lower priority when compared to more critical applications that require more stringent SLAs.</i></p> <p><i>Applications that might fit into this category would be email, FTP and lower priority database replication.</i></p> |  |                             |
| 2 | <i>Ethernet Private LAN (EP-LAN) MAE Service</i>   | <i>Ethernet Private LAN (EP-LAN) Description</i>   | 301615                      |

**Table 3.2.1.6.b – Unsolicited MAE Services and Features**

|                 | Feature Name  | Feature Description  | Bidder's Product Identifier |
|-----------------|---|--|-----------------------------|
|                 |   | <p>Bidder's Product Description:</p> <p><i>This service shall provide a logical Multipoint-to-Multipoint connection between three (3) or more Customer locations or Customer locations and the Service Provider Point of Presence (POP), Interexchange Carrier POP, or another 3rd party location. An EP-LAN service shall enable Customers to use any VLANs or layer 2 control protocols across the service without coordination with the Contractor. The EP-LAN service complies with the same Industry requirements as the EPL services such as MEF, IEEE, IETF, and the ITU.</i></p> <p><i>The EP-LAN service shall enable Customers to connect their Customer Premise Equipment (CPE) using an Ethernet interface and provide one (1) Ethernet Virtual Connection (EVC) between multiple Customer locations either within or across metro regions as a fully meshed wide area network.</i></p> <p><i>EP-LAN services support the customer's four CoS options of Basic, Standard, Priority, and Premium. Unicast, Multicast and Broadcast frames will be supported and delivered unconditionally. EP-LAN will support IEEE 802.1Q. MTU size of 1600 Bytes will be supported on an E-LAN service. UNI interfaces for E-LAN will support 10/100/1000BaseT, 1000BaseSX, or 10GBase-SR interfaces.</i></p> <p><i>Product Benefits:</i></p> <p><i>E-LAN allows remote locations or nodes to share Ethernet traffic as if they were all locally connected to the same in-building network. It is a service type for multipoint Layer-2 Virtual Private LANs (VPNs), transparent LAN service, and multicast networks.</i></p> |                             |
|                 |   | <p><i>Service Limitations:</i></p> <p><i>Service availability for EVCs greater than 1 Gbps is limited to those areas deemed as on-net or near-net fiber locations for Integra.</i></p>   |                             |
| <p><b>3</b></p> | <p><i>EP-LAN MAE Service Connection 10/100 Mbps</i></p> | <p><i>10/100 Mbps Ethernet port per location (UNI); Assessed per interface at bandwidths of 10/100 Mbps (10/100BASE-T). The EP-LAN connection rate element includes the physical connection (Access Link) between the Customer's demarcation and the core Ethernet network, the port, one (1) Best Effort EVC and the NI.</i></p>  | <p>301616</p>               |

**3.2.1.7 MAE Service Geographic Requirements**

**Bidders shall identify the locations where their Ethernet Services are available in Table 3.2.1.7.a.** By indicating "X" in the table below, Contractor commits to provide the services in the cities identified below. Commitment is subject to facility availability either through Contractor owned facilities or third-party agreements. Contractor's rates for the MAE services shall be the same for all geographic locations. Bidders may reference Table 3.2.1.7.a or Table 3.2.1.7.b in their Catalog A, Geographic Availability response. Bidders Catalog A language shall not conflict with the requirements described herein.

Table 3.2.1.7.a – Bidder's EVL and EVPL Services Available Areas

|   | Service Location | EPL MAE Service Connections |        | EVPL MAE Service Connections |        |
|---|------------------|-----------------------------|--------|------------------------------|--------|
|   |                  | 10/100 Mbps                 | 1 Gbps | 10/100 Mbps                  | 1 Gbps |

**Bidders may identify additional unsolicited locations where their Ethernet Services are available in Table 3.2.1.7.b.** By indicating “X” in the table below, Contractor commits to providing the Services identified in this section. Commitment is subject to facility availability either through Contractor owned facilities or third-party agreements. Contractor’s rates for the MAE services shall be the same for all geographic locations. Additional lines may be added as necessary. Bidders may reference Table 3.2.1.7.a or Table 3.2.1.7.b in their Catalog A, Geographic Availability response. Bidder’s Catalog A language shall not conflict with the requirements described herein.

If Bidder is unable to identify all service areas within Table 3.2.1.7.a, Bidder shall provide additional information in the form of a coverage map that includes unincorporated areas.

**Table 3.2.1.7.b – Unsolicited Bidder’s EVL and EVPL Services Available Areas**

|    | Service Location | EPL MAE Service Connections |        | EVPLMAE Service Connections |        |
|----|------------------|-----------------------------|--------|-----------------------------|--------|
|    |                  | 10/100 Mbps                 | 1 Gbps | 10/100 Mbps                 | 1 Gbps |

| 9  |                  |                             |        |                             |        |
| 10 |                  |                             |        |                             |        |

**3.3 NETWORK DISASTER/OPERATIONAL RECOVERY**

**3.3.1 TELECOMMUNICATIONS SERVICE PRIORITY (TSP) PROGRAM**

The Contractor shall comply with the Telecommunications Service Priority (TSP) Program, a Federal Communications Commission (FCC) mandate for prioritizing service requests by identifying those services critical to National Security and Emergency Preparedness (NS/EP) and be in compliance with all related CPUC and FCC requirements.

Bidder understands the Requirement and shall meet or exceed it? Yes  X  No \_\_\_

**3.3.2 DATA NETWORK DISASTER/OPERATIONAL RECOVERY**

Public safety agencies, major data centers, agencies with supporting roles during disaster or emergency operations, and agencies with significant roles in post-disaster recovery have mission-critical needs to maintain network availability during disasters or emergencies.

It is essential that service be restored as soon as possible, and the services most critical to State operations remain operational during efforts to achieve full service recovery.

Bidder understands the Requirement and shall meet or exceed it? Yes  X  No \_\_\_

### **3.4 OTHER SERVICES**

#### **3.4.1 HOURLY RATES FOR SERVICES**

The hourly classifications of hours worked for services described in this section will be as follows:

1. Regular Hours – Hours worked between 8:00AM and 4:59PM, Monday through Friday.
2. Overtime Hours – Hours worked between 5:00PM and 7:59AM, Monday through Friday and all day Saturday.
3. Sunday and Holiday Hours – Any hours worked on Sunday or State of California holidays.

#### **3.4.2 EXTENDED DEMARCATION WIRING SERVICES**

The Contractor shall provide Extended Demarcation (Extended Demarc) wiring to support the services covered by this IFB for all Customer occupied buildings where services under this Contract are being offered. Extended Demarc wiring includes wiring and cable related activities required to extend the service demarcation point to the Customer defined termination location or cross-connect point from the Contractor's Minimum Point of Entry (MPOE).

Extended Demarc wiring shall include all necessary hardware including wire and/or cable, connectors, jumpers, patch panels, minor materials and jacks. Extended Demarc wiring shall also include all necessary labor required to complete the provisioning of service including installation, testing, trouble shooting, labeling and documentation.

Extended Demarc wiring is limited to the following:

1. Installation of cabling for extending services from the MPOE location to the Customer's point of utilization;
2. Installation of cross-connects or rearrangement of existing jumpers;
3. Identification and testing of existing cabling beyond the MPOE to the Customer's equipment location; or,
4. Testing, trouble shooting, labeling and completing documentation.

The Contractor shall provide installations in accordance with the timeframes identified for the services that this cabling will support, and shall be subject to the SLAs detailed in Section 3.5.8.9 (Provisioning SLAs) associated with that service.

The Contractor shall not be required to complete Extended Demarc wiring from the MPOE to the extended Demarc location if:

1. The wire/cable pathway is blocked and cannot be cleared in less than 20 minutes or if the Contractor would cause damage to the Customer site or existing cabling in clearing the pathway;
2. The wire/cable pathway is in an asbestos environment or other environment hazardous to the Contractor's personnel, or where such work would be hazardous to the public or to the Customer's staff; or,
3. Written release of the responsibility to provide the Extended Demarc is provided by either the Customer or by CALNET 3 CMO.

Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet

Bidder shall provide a price in the Cost Worksheets for all labor and materials required for Extended Demarc wiring necessary to complete the provisioning of one (1) Demarc extension as described above. Bidder shall provide one (1) price for each media identified.

The Contractor shall install wiring according to industry standards and cabling recommendations published in the State Telecommunications Management Manual (STMM), Facilities Management Chapter, Uniform Building Cabling/Wiring current at the time of this IFB and as periodically updated by CALNET 3 CMO. Additionally, the Contractor shall install and maintain all wiring in accordance with all applicable EIA/TIA, BICSI, and ITU-T recommended standards current at the time of installation or maintenance.

The Contractor shall provide extended Demarcation Services limited to one (1) occurrence or installation for the specific telecommunications service the cabling is meant to support and must be ordered in conjunction with the service being provisioned. All other cabling will be the responsibility of the Customer and will be acquired through other procurement vehicles.

Bidder understands the Requirement and shall meet or exceed it? Yes X No     

The Contractor shall offer the wiring services for extended demarcation detailed in Table 3.4.2.a.

**3.4.3 SERVICES RELATED HOURLY SUPPORT**

The Contractor shall provide labor for the diagnosis and/or repair of services listed in this Contract and all costs for repair are the responsibility of the service provider unless it is specifically determined that the cause of service failure is outside the scope of the Contractors responsibilities Work performed under this Section 3.4.3 is authorized only for situations where the Contractor has dispatched personnel to diagnose a service problem that is discovered to be caused by factors outside the responsibility of the Contractor or no trouble is found.

In Cost Worksheet 3.4.3, the Contractor shall provide a fixed hourly rate schedule for the labor classifications required to diagnose and/or repair the contracted services. The rates identified shall only be used for the diagnosis and/or repair of contracted services and no materials shall be included in the rates. The total amount of labor hours permitted to be performed is ten (10) hours per dispatch/occurrence.

*Bidder understands the Requirement and shall meet or exceed it? Yes  X  No*

The Contractor shall offer emergency restoration services as detailed in Table 3.4.3.

**Table 3.4.3 Services Related Hourly Support**

**3.5 SERVICE LEVEL AGREEMENTS (SLA)**

The Contractor shall provide Service Level Agreements (SLAs) as defined below. The intent of this section is to provide Customers, CALNET 3 CMO and the Contractor with requirements that define and assist in the management of the SLAs. This section includes the SLA formats, general requirements, stop clock conditions, and the Technical SLAs for the services identified in this solicitation.

**3.5.1 SERVICE LEVEL AGREEMENT FORMAT**

The Contractor shall adhere to the following format and include the content as described below for each Technical SLA added by the Contractor throughout the Term of the Contract:

1. SLA Name - Each SLA Name must be unique;
2. Definition - Describes what performance metric will be measured;
3. Measurements Process - Provides instructions how the Contractor will continuously monitor and measure SLA performance to ensure compliance. The Contractor shall provide details describing how and what will be measured. Details shall include source of data and define the points of measurement within the system, application, or network;
4. Service(s) - All applicable Categories or Subcategories will be listed in each SLA;
5. Objective(s) – Defines the SLA performance goal/parameters; and,
6. Rights and Remedies
  - a. Per Occurrence: Rights and remedies are paid on a per event basis during the bill cycle; and,
  - b. Monthly Aggregated Measurements: Rights and remedies are paid once during the bill cycle based on an aggregate of events over a defined period of time.

The Contractor shall proactively apply an invoice credit or refund when an SLA objective is not met. CALNET SLA Rights and Remedies do not require the Customer to submit a request for credit or refund.

*Bidder understands the Requirement and shall meet or exceed it? Yes X No \_\_\_*

**3.5.2 TECHNICAL REQUIREMENTS VERSUS SLA OBJECTIVES**

Sections 3.2 (Ethernet Services), 3.3 (Network Disaster/Operational Recovery) and 3.4 (Other Services) define the technical requirements for each service. These requirements are the minimum parameters each Bidder must meet in order to qualify for Contract award. Upon Contract award the committed technical requirements will be maintained throughout the remainder of the Contract.

Committed SLA objectives are minimum parameters which the Contractor shall be held accountable for all rights and remedies throughout Contract Term.

*Bidder understands the Requirement and shall meet or exceed it? Yes X No \_\_\_*

**3.5.3 TWO METHODS OF OUTAGE REPORTING: CUSTOMER OR CONTRACTOR**

There are two (2) methods in which CALNET 3 service failures or quality of service issues may be reported and Contractor trouble tickets opened: Customer reported or Contractor reported.

The first method of outage reporting results from a Customer reporting service trouble to the Contractor's Customer Service Center via phone call or opening of a trouble ticket using the on-line Trouble Ticket Reporting Tool (IFB STPD 12-001-B Business Requirements Section B.9.4).

The second method of outage reporting occurs when the Contractor opens a trouble ticket as a result of network/system alarm or other method of service failure identification. In each instance the Contractor shall open a trouble ticket using the Trouble Ticket Reporting Tool (IFB STPD 12-001-B Business Requirements Section B.9.4) and monitor and report to Customer until service is restored.

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

### 3.5.4 **BIDDER RESPONSE TO SERVICE LEVEL AGREEMENTS**

Many of the Service Level Agreements described below include multiple objective levels – Basic, Standard and Premier. **Bidders shall indicate one (1) specific objective level they are committing to for each service in space provided in the “Objective” section of each SLA description.**

*Bidder understands the Requirement and shall meet or exceed it? Yes  No*

### 3.5.5 CONTRACTOR SLA MANAGEMENT PLAN

Within 90 calendar days of Contract award, the Contractor shall provide CALNET 3 CMO with a detailed SLA Management Plan that describes how the Contractor will manage the Technical SLAs for services in this IFB. The SLA Management plan shall provide processes and procedures to be implemented by the Contractor. The SLA Management Plan shall define the following:

1. Contractor SLA Manager and supporting staff responsibilities;
2. Contractor's process for measuring objectives for each SLA. The process shall explain how the Contractor will continuously monitor and measure SLA performance to ensure compliance. The Contractor shall provide details describing how and what will be measured. Details should include source of data and define the points of measurement within the system, application, or network;
3. Creation and delivery of SLA Reports (IFB STPD 12-001-B Business Requirements Section B.9.5). The Contractor shall include a sample report in accordance with IFB STPD 12-001-B Business Requirements Section B.9.5 (SLA Reports) for the following: SLA Service Performance Report (Section IFB STPD 12-001-B Business Requirements Section B.9.5.1), SLA Provisioning Report (IFB STPD 12-001-B Business Requirements Section B.9.5.2), and SLA Catastrophic Outage Reports (IFB STPD 12-001-B Business Requirements Section B.9.5.3). The Contractor shall commit to a monthly due date. The reports shall be provided to the CALNET 3 CMO via the Private Oversight Website (IFB STPD 12-001-B Business Requirements Section B.9.2);
4. SLA invoicing credit and refund process;
5. Contractor SLA problem resolution process for SLA management and SLA reporting. The Contractor shall provide a separate process for Customers and CALNET 3 CMO; and,
6. Contractor SLA Manager to manage all SLA compliance and reporting. The Contractor shall include SLA Manager contact information for SLA inquiries and issue resolution for Customer and CALNET 3 CMO.

*Bidder understands the Requirement and shall meet or exceed it? Yes X No \_\_\_*

### 3.5.6 TECHNICAL SLA GENERAL REQUIREMENTS

The Contractor shall adhere to the following general requirements which apply to all CALNET 3 Technical SLAs (Section 3.5.8):

1. With the exception of the Provisioning SLA, the total SLA rights and remedies for any given month shall not exceed the sum of 100 percent of the Total Monthly Recurring Charges (TMRC). Services with usage charges shall apply the Average Daily Usage Charge (ADUC) in addition to any applicable TMRC rights and remedies;
2. If a circuit or service fails to meet one (1) or more of the performance objectives, only the SLA with the largest monthly Rights and Remedies will be credited to the Customer, per event;

---

Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet

---

3. The Contractor shall apply CALNET 3 SLAs and remedies for services provided by Subcontractors and/or Affiliates;
4. The Definition, Measurement Process, Objectives, and Rights and Remedies shall apply to all services identified in each SLA. If a Category or Subcategory is listed in the SLA, then all services under that Category or Subcategory are covered under the SLA. Exceptions must be otherwise stated in the SLA;
5. TMRC rights and remedies shall include the service, option(s), and feature(s) charges;
6. The Contractor shall proactively and continuously monitor and measure all Technical SLA objectives;
7. The Contractor shall proactively credit all rights and remedies to the Customer within 60 calendar days of the trouble resolution date on the trouble ticket or within 60 calendar days of the Due Date on the Service Request for the Provisioning SLA;
8. To the extent that Contractor offers additional SLAs, or SLAs with more advantageous rights and/or remedies for same or similar services offered through tariffs, online service guides, or other similarly situated government contracts (Federal, State, County, City), The State will be entitled to the same rights and/or remedies therein. The Contractor shall present the SLAs to CALNET 3 CMO for possible inclusion via amendments;
9. The Contractor shall apply CALNET 3 SLAs and remedies to services provided in all areas the Contractor provides service and/or open to competition (as defined by the CPUC). Any SLAs and remedies negotiated between Contractor and Incumbent Local Exchange Carriers in territories closed to competition shall be passed through to the CALNET 3 Customer;
10. The election by CALNET 3 CMO of any SLA remedy covered by this Contract shall not exclude or limit CALNET 3 CMO's or any Customer's rights and remedies otherwise available within the Contract or at law or equity;
11. The Contractor shall apply rights and remedies when a service fails to meet the SLA objective even when backup or protected services provide Customer with continuation of services;
12. The Contractor shall act as the single point of contact in coordinating all entities to meet the State's needs for provisioning, maintenance, restoration and resolution of service issues or that of their Subcontractors, Affiliates or resellers under this Contract;
13. The Customer Escalation Process (IFB STPD 12-001-B Business Requirements Section B.3.4.2) and/or the CALNET 3 CMO Escalation Process (IFB STPD 12-001-B Business Requirements Section B.3.4.1) shall be considered an additional right and remedy if the Contractor fails to resolve service issues within the SLA objective(s);
14. Trouble reporting and restoration shall be provided 24x365 for CALNET 3 services;
15. SLAs apply 24x365 unless SLA specifies an exception;

- 16. Contractor invoices shall clearly cross reference the SLA credit to the service Circuit ID in accordance with IFB STPD 12-001-B Business Requirements Section B.5.1 (Billing and Invoicing Requirements, #14);
- 17. The Contractor shall provide a CALNET 3 SLA Manager responsible for CALNET 3 SLA compliance. The SLA Manager shall attend regular meetings and be available upon request to address CALNET 3 CMO SLA oversight, report issues, and problem resolution concerns. The CALNET 3 SLA Manager shall also coordinate SLA support for Customer SLA inquiries and issue resolution;
- 18. The Contractor shall provide Customer and CALNET 3 CMO support for SLA inquiries and issue resolution; and,
- 19. Any SLAs and remedies negotiated between Contractor and third party service provider in territories closed to competition shall be passed through to the CALNET 3 Customer.

Bidder understands the Requirement and shall meet or exceed it? Yes  X  No

**3.5.7 TROUBLE TICKET STOP CLOCK CONDITIONS**

The following conditions shall be allowed to stop the trouble ticket Outage Duration for CALNET 3 Contractor trouble tickets. The Contractor shall document the trouble ticket Outage Duration using the Stop Clock Condition (SCC) listed in Table 3.5.7 and include start and stop time stamps in the Contractor’s Trouble Ticket Reporting Tool (IFB STPD 12-001-B Business Requirements Section B.9.4) for each application of a SCC.

Note: The Glossary (SOW Appendix A) defines term “End-User” as the “individual within an Entity that is utilizing the feature or service provided under the Contract.”

Stop Clock Conditions are limited to the conditions listed in Table 3.5.7.

**Table 3.5.7 – Stop Clock Conditions (SCC)**

| # | Stop Clock Condition (SCC) | SCC Definition  |
|---|----------------------------|---|
| 1 | <b>END-USER REQUEST</b>    | Periods when a restoration or testing effort is delayed at the specific request of the End-User. The SCC shall exist during the period the Contractor was delayed, provided that the End-User’s request is documented and time stamped in the Contractor’s trouble ticket or Service Request system and shows efforts are made to contact the End-User during the applicable Stop Clock period. |
| 2 | <b>OBSERVATION</b>         | Time after a service has been restored but End-User request ticket is kept open for observation. If the service is later determined by the End-User to not have been restored, the Stop Clock shall continue until the time the End-User notifies the Contractor that the Service has not been restored.  |

## Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet

Table 3.5.7 – Stop Clock Conditions (SCC)

| #  | Stop Clock Condition (SCC)    | SCC Definition  |
|----|-------------------------------|---|
| 3  | <b>END-USER NOT AVAILABLE</b> | Time after a service has been restored but End-User is not available to verify that the Service is working. If the service is later determined by the End-User to not have been restored, the Stop Clock shall apply only for the time period between Contractor's reasonable attempt to notify the End-User that Contractor believes the service has been restored and the time the End-User notifies the Contractor that the Service has not been restored.   |
| 4  | <b>WIRING</b>                 | Restoration cannot be achieved because the problem has been isolated to wiring that is not maintained by Contractor or any of its Subcontractors or Affiliates. If it is later determined the wiring is not the cause of failure, the SCC shall not apply.  |
| 5  | <b>POWER</b>                  | Trouble caused by a power problem outside of the responsibility of the Contractor.  |
| 6  | <b>FACILITIES</b>             | Lack of building entrance Facilities or conduit structure that are the End-User's responsibility to provide.  |
| 7  | <b>ACCESS</b>                 | Limited access or contact with End-User provided the Contractor documents in the trouble ticket several efforts to contact End-User for the following: <ul style="list-style-type: none"> <li>a. Access necessary to correct the problem is not available because access has not been arranged by site contact or End-User representative;</li> <li>b. Site contact refuses access to technician who displays proper identification;</li> <li>c. Customer provides incorrect site contact information which prevents access, provided that Contractor takes reasonable steps to notify End-User of the improper contact information and takes steps to obtain the correct information ; or,</li> <li>d. Site has limited hours of business that directly impacts the Contractor's ability to resolve the problem.</li> </ul> <p>If it is determined later that the cause of the problem was not at the site in question, then the Access SCC shall not apply.</p> |
| 8  | <b>STAFF</b>                  | Any problem or delay to the extent caused by End-User's staff that prevents or delays Contractor's resolution of the problem. In such event, Contractor shall make a timely request to End-User staff to correct the problem or delay and document in trouble ticket.   |
| 9  | <b>APPLICATION</b>            | End-User software applications that interfere with repair of the trouble.   |
| 10 | <b>CPE</b>                    | Repair/replacement of Customer Premise Equipment (CPE) not provided by Contractor if the problem has been isolated to the CPE. If determined later that the CPE was not the cause of the service outage, the CPE SCC will not apply.  |

## Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet

**Table 3.5.7 – Stop Clock Conditions (SCC)**

| #  | Stop Clock Condition (SCC) | SCC Definition  |
|----|----------------------------|---|
| 11 | <b>NO RESPONSE</b>         | Failure of the trouble ticket originator or responsible End-User to return a call from Contractor's technician for on-line close-out of trouble tickets after the Service has been restored as long as Contractor can provide documentation in the trouble ticket substantiating the communication from Contractor's technician.  |
| 12 | <b>MAINTENANCE</b>         | An outage directly related to any properly performed scheduled maintenance or upgrade scheduled for CALNET 3 service. Any such stop clock condition shall not extend beyond the scheduled period of the maintenance or upgrade. SLAs shall apply for any maintenance caused outage beyond the scheduled maintenance period. Outages occurring during a scheduled maintenance or upgrade period and not caused by the scheduled maintenance shall not be subject to the Maintenance SCC. |
| 13 | <b>THIRD PARTY</b>         | Any problem or delay caused by a third party not under the control of Contractor, not preventable by Contractor, including, at a minimum, cable cuts not caused by the Contractor. Contractor's Subcontractors and Affiliates shall be deemed to be under the control of Contractor with respect to the equipment, services, or Facilities to be provided under this Contract.  |
| 14 | <b>FORCE MAJEURE</b>       | Force Majeure events, as defined in the PMAC General Provisions - Telecommunications, Section 28 (Force Majeure).   |

Bidder understands the Requirement and shall meet or exceed it? Yes X No \_\_\_

**3.5.8 TECHNICAL SERVICE LEVEL AGREEMENTS**

The Contractor shall provide and manage the following Technical SLAs.

**3.5.8.1 Availability (M-S)**

| <b>SLA Name:</b> Availability   |  |              |             |  |             |  |  |         |         |         |          |  |         |         |         |          |  |         |         |         |          |
|---|--|--------------|-------------|--|-------------|--|--|---------|---------|---------|----------|--|---------|---------|---------|----------|--|---------|---------|---------|----------|
| <b>Definition:</b> The percentage of time a CALNET 3 service is fully functional and available for use each calendar month.   |  |              |             |  |             |  |  |         |         |         |          |  |         |         |         |          |  |         |         |         |          |
| <b>Measurement Process:</b> The monthly Availability Percentage shall be based on the accumulative total of all Unavailable Time derived from all trouble tickets closed, for the affected service (Per Circuit ID), per calendar month. The monthly Availability Percentage equals the Scheduled Uptime per month less Unavailable Time per month divided by Scheduled Uptime per month multiplied by 100. Scheduled Uptime is 24 x number of days in the month. All Unavailable Time applied to other SLAs, which results in a remedy, will be excluded from the monthly accumulated total. |  |              |             |  |             |  |  |         |         |         |          |  |         |         |         |          |  |         |         |         |          |
| <b>Services:</b>  |  |              |             |  |             |  |  |         |         |         |          |  |         |         |         |          |  |         |         |         |          |
| <b>MAE Service</b>  |  |              |             |  |             |  |  |         |         |         |          |  |         |         |         |          |  |         |         |         |          |
| <b>Objective(s):</b><br>The objective shall be based on the UNI physical interface:   |  |              |             |  |             |  |  |         |         |         |          |  |         |         |         |          |  |         |         |         |          |

Bidder understands the Requirement and shall meet or exceed it? Yes  X  No \_\_\_

**3.5.8.6 Notification**

|   |   |
|---|---|
| <b>SLA Name:</b> Notification   |   |
| <b>Definition:</b> The Contractor notification to CALNET 3 CMO and designated stakeholders in the event of a CAT 2 or CAT 3 failure, Contractor, Subcontractor or Affiliate network event, terrorist activity, threat of natural disaster, or actual natural disaster which results in a significant loss of telecommunication services to CALNET 3 End-Users or has the potential to impact services in a general or statewide area. The State understands initial information regarding the nature of the outage may be limited.  |   |
| <b>Measurement Process:</b> The Contractor shall adhere to the Network Outage Response requirements (IFB STPD 12-001-B Business Requirements Section B.3.3) and notify the CALNET 3 CMO and designated stakeholders for all CAT 2 and CAT 3 Outages or for network outages resulting in a significant loss of service. Notification objectives will be based on the start time of the outage failure determined by the opening of a trouble ticket or network alarm, whichever occurs first. For events based on information such as terrorist activity or natural disaster, the Contractor shall notify CALNET 3 CMO and designated stakeholder when information is available. |   |
| <b>Service(s):</b> All Services   |   |
| <b>Objective (s):</b> Within 60 minutes of the above mentioned failures' start time, the Contractor shall notify CALNET 3 CMO and designated stakeholders using a method defined in IFB STPD 12-001-B Business Requirements Section B.3.3 (Network Outage Response).<br><br>At 60 minute intervals, updates shall be given on the above mentioned failures via the method defined in Section IFB STPD 12-001-B Business Requirements Section B.3.3 (Network Outage Response).<br><br>This objective is the same for Basic, Standard and Premier commitments.  |   |
| <b>Rights and Remedies</b>  | <b>Per Occurrence:</b> Senior Management Escalation |
|   | <b>Monthly Aggregated Measurements:</b> N/A         |

Volume 2: Category 3 – Metropolitan Area Network (MAN) Ethernet

**3.5.8.7 Latency (M-S)**

|  |  |                     |                    |   |
|--|--|---------------------|--------------------|---|
| <b>SLA Name:</b> Latency   |  |                     |                    |   |
| <b>Definition:</b> Latency is the amount of time necessary for a typical Ethernet frame to traverse one way from the originating UNI, across the Contractor's, Affiliate, or Subcontractor's network, to the remote UNI(s) on each EVC identified by the Customer.   |  |                     |                    |   |
| <b>Measurement Process:</b> End-User/Customer is responsible for opening a trouble ticket with the Contractor's Customer Service Center (helpdesk) when the Latency exceeds the committed level. Latency shall be measured from the first bit of and Ethernet frame entering the ingress UNI to when the last bit of the same frame leaves the egress UNI. The problem requires timely verification, consistent with industry standards, by the Contractor. Tickets identified as a Latency issue shall not count in Availability or Time-to-Repair measurements unless and until the End-User reports service as unusable for its intended uses.<br><br>This measurement includes the local loop transport under the control of the Contractor and any local loops acquired from a third party by the Contractor. |  |                     |                    |   |
| <b>Service(s):</b>   |  |                     |                    |   |
| MAE Service  |  |                     |                    |   |
| <b>Objective (s):</b><br>The Unavailable Time objective shall not exceed:  |  |                     |                    |   |
|  |  |                     |                    | <b>Bidders Objective Commitment (B, S or P)</b> |
|  | <b>Basic (B)</b>   | <b>Standard (S)</b> | <b>Premier (P)</b> |   |

Bidder understands the Requirement and shall meet or exceed it? Yes X No

**3.5.8.8 Packet Loss (M-S)**

|  |  |                   |                     |                    |   |
|--|--|-------------------|---------------------|--------------------|---|
| <b>SLA Name:</b> Packet Loss   |  |                   |                     |                    |   |
| <b>Definition:</b> A measurement of lost or dropped packet traveling across the Contractor's, Affiliate's or Subcontractor's network. Packet loss is the difference between the number of packets transmitted at the ingress UNI and the total number of packets received at the egress UNI.   |  |                   |                     |                    |   |
| <b>Measurement Process:</b> End-User/Customer is responsible for opening a trouble ticket with the Contractor's Customer Service Center (helpdesk) when the packet loss exceeds the committed level. The problem requires timely verification, consistent with industry standards, by the Contractor. Tickets identified as a packet loss issue shall not count in Availability or Time-to-Repair measurements unless and until the End-User reports service as unusable for its intended uses.<br><br>This measurement includes the local loop transport under the control of the Contractor and any local loops acquired from a third party by the Contractor. |  |                   |                     |                    |   |
| <b>Service(s):</b>   |  |                   |                     |                    |   |
| MAE Service  |  |                   |                     |                    |   |
| <b>Objective (s):</b><br>The Packet Loss objective shall not exceed:   |  |                   |                     |                    |   |
|  |  | <b>Basic (B)</b>  | <b>Standard (S)</b> | <b>Premier (P)</b> | <b>Bidders Objective Commitment (B, S or P)</b> |
|  | MAE Service  | ≤ .7% packet loss | ≤ .5% packet loss   | ≤ .2% packet loss  | <b>S</b>  |
| <b>Rights and Remedies</b>   | <b>Per Occurrence:</b> 15 percent of the TMRC for the reported service<br><br>Next consecutive month to fail to meet the committed SLA objectives shall result in a 25 percent rebate of TMRC.<br><br>Each additional consecutive month to fail to meet the committed SLA objective shall result in a 35 percent rebate of TMRC. |                   |                     |                    |   |
|  | <b>Monthly Aggregated Measurements:</b> N/A  |                   |                     |                    |   |

Bidder understands the Requirement and shall meet or exceed it? Yes  X  No

**3.5.8.9 Provisioning (M-S)**

|   |   |   |                                    |  |
|---|---|---|------------------------------------|--|
| <b>SLA Name:</b> Provisioning   |   |   |                                    |  |
| <p><b>Definition:</b> Provisioning shall include new services, moves, adds and changes completed by the Contractor on or before the due dates. The Provisioning SLA shall be based on committed installation intervals established in this SLA or due dates negotiated between Customer and Contractor documented on the Contractor's order confirmation notification or Contracted Service Project Work SOW in accordance with IFB STPD 12-001-B Section B.2.5.4 #7 (Provisioning and Implementation). The Contractor shall meet the committed interval dates or due date negotiated with the Customer. If the Customer agrees to a negotiated due date, the negotiated due date supersedes the committed interval. At the Customer's discretion, if the scope of the Service Request(s) meets the Coordinated or Managed Project criteria, negotiated due dates will be established and documented in the Project Schedule per IFB STPD 12-001-B Business Requirements Section B.6 (Contracted Service Project Work).</p> <p>Provisioning SLAs have two (2) objectives:</p> <p>Objective 1: Individual Service Request; and</p> <p>Objective 2: Successful Install Monthly Percentage by Service Type.</p> <p>Note: Provisioning timelines include extended demarcation wiring, when appropriate.</p> |   |   |                                    |  |
| <b>Measurement Process:</b>   |   |   |                                    |  |
| <p><u>Objective 1: Individual Service Request:</u> Install intervals are based on the committed installation intervals established in this SLA or due dates negotiated between Customer and Contractor. This objective requires the Contractor to meet the due date for each individual Service Request.</p> <p><u>Objective 2: Successful Install Monthly Percentage per service Type:</u> The Contractor shall sum all individual Service Requests per service, as listed below, meeting the objective in the measurement period (per month) and divide by the sum of all individual Service Requests due per service in the measurement period and multiply by 100 to equal the percentage of Service Requests installed on time. The Contractor must meet or exceed the objective below in order to avoid the rights and remedies.</p>  |   |   |                                    |  |
| <b>Service (Features must be installed in conjunction with the service except when listed below)</b>  |   | <b>Committed Interval Calendar Days</b> | <b>Coordinated/Managed Project</b> |  |
| MAE Service   |   | 30                                      | Coordinated/Managed Project        |  |
| <b>Objective (s):</b>   |   |   |                                    |  |
| <p>Objective 1: Individual Service Request: Service installed on or before the Committed Interval or negotiated due date.</p> <p>Objective 2: Successful Install Monthly Percentage per Service:</p>  |   |   |                                    |  |
|   |   | <b>Basic (B)</b>                        | <b>Standard (S)</b>                | <b>Premier (P)</b>                           |

**3.5.8.11** Managed Service Proactive Notification (M-S)

|   |   |
|---|---|
| <b>SLA Name:</b> Managed Service Proactive Notification   |   |
| <p><b>Definition:</b> The proactive outage notification provides credits if the Contractor fails to open a trouble ticket and notify Customer of an Outage for a managed router service. Notification to the Customer shall occur through means agreed to by Contractor and CALNET 3 CMO.</p> <p>An Outage is defined as an unscheduled period in which the managed router service is interrupted and unavailable for use by Customer for 60 continuous seconds or more than 60 cumulative seconds within a 15-minute period measured by the Contractor.</p>  |   |
| <p><b>Measurement Process:</b> The Outage Duration start shall be determined by the first Contractor network alarm resulting from the outage-causing event or the opening of a trouble ticket by the Customer, whichever occurs first. The Contractor has fifteen (15) minutes (Notification Period) to notify the Customer from the start point of the first network alarm. The Contractor is in compliance with the proactive outage notification SLA if the Customer opened the trouble ticket prior to the network alarm or Customer is notified by the Contractor within the Notification Period</p> |   |
| <b>Service(s):</b>  |   |
| MAE Services, with Managed Router   |   |
| <b>Objective (s):</b> 15 Minutes  |   |
| <b>Rights and Remedies</b>  | <b>Per Occurrence:</b> Customer will receive a credit equal to ten percent of the TMRC for Managed Internet Service (Circuit ID) that was impacted during an outage if the Customer was not proactively notified within the notification period |
|   | <b>Monthly Aggregated Measurements:</b> N/A   |

**SOW CATALOG A**

**Instructions:**

Bidders should refer to IFB STPD 12-001-B Section 4.4.2, *SOW Catalog A – Final List of Awarded Items with Bid Costs*, for instructions regarding completing this Catalog A.

Provide the name of the Bidding organization below:

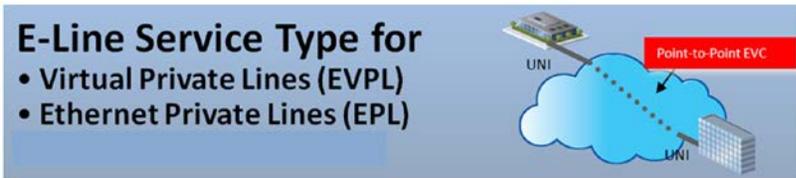

Name of Bidder: [Integra Telecom Holdings, Inc.](#)

Category 3 – Metropolitan Area Network (MAN) Ethernet  
Volume 3 SOW Catalog A

**3.2.1.6.a MAE Services and Features**

**Contractor's Summary description of service:**

Integra provides three Classes of Service (CoS) options (also known as Standard Class of Service) for the EPL/EVPL metro area network Ethernet (MAE) service: BASIC, PRIORITY and PREMIUM. The CoS options allows for differentiated service performance levels for different types of network traffic. CoS options allows Customers to prioritize mission-critical traffic from lesser priority traffic in the network. The CoS is associated with the bandwidth usage rate Committed Information Rate (CIR) ordered by the Customer for each connection at the Customer locations. If the Customer requests multiple EVCs per location, then a CoS is associated with each EVC.

**Geographic Availability:**

Integra's MAE service is available in the geographic areas described on Table 3.2.1.7 MAE Service Geographic Requirements in the SOW Technical Requirements document for Category 3 - MAN Ethernet, which consists of the following cities:

|                |                |                 |
|----------------|----------------|-----------------|
| Citrus Heights | Palo Alto      | San Francisco   |
| Cotati         | Petaluma       | San Jose        |
| Elk Grove      | Pleasanton     | San Rafael      |
| Folsom         | Rancho Cordova | Santa Clara     |
| Milpitas       | Rohnert Park   | Santa Rosa      |
| Oakland        | Sacramento     | Sunnyvale       |
|                |                | West Sacramento |

**Service Limitations and Restrictions**

Integra's Metro Area Network Ethernet services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

| 9  | Additional MAE MAC Addresses (51-100) | 301009                          | MAC Address rate element is a data link layer protocol used for Layer 2 connectivity. Standard service allows up to 50 MAC addresses to be present per EPL/EVPL connection. This optional feature increases that limit to up to 100 MAC addresses per EPL/EVPL connection. A technical review will be necessary to determine if service can be provided and for approval to exceed the limit. |  | \$5.00                        | \$0.50                                 | Each            | N/A                        |
| 10   | Ethernet Virtual Connection (EVC) MAE | 301010                          | EVC rate element. EVCs shall be assigned in 1 Mbps increments within each port range. Customer may order additional EVCs to establish additional virtual connections over the same physical connections. When additional EVCs are ordered, the Customer must designate the portion of the CIR bandwidth assigned to each EVC.   |  | \$5.00                        | \$0.50                                 | Each            | N/A                        |

Volume 3 SOW Catalog A

**3.2.1.6.b Unsolicited EP-LAN MAE Services and Features**

**Contractor's Summary description of service:**

Integra provides three Classes of Service (CoS) options (also known as Standard Class of Service) for the EP-LAN metro area network Ethernet (MAE) service: BASIC, PRIORITY and PREMIUM. The CoS options allows for differentiated service performance levels for different types of network traffic. CoS options allows Customers to prioritize mission-critical traffic from lesser priority traffic in the network. The CoS is associated with the bandwidth usage rate Committed Information Rate (CIR) ordered by the Customer for each connection at the Customer locations. If the Customer requests multiple EVCs per location, then a CoS is associated with each EVC.

This service shall provide a logical Multipoint-to-Multipoint connection between three (3) or more Customer locations or Customer locations and the Service Provider Point of Presence (POP), Interexchange Carrier POP, or another 3rd party location as a fully meshed service. An EP-LAN service shall enable Customers to use any VLANs or layer 2 control protocols across the service without coordination with the Contractor. The EP-LAN service complies with the same Industry requirements as the EPL services such as MEF, IEEE, IETF, and the ITU.

**Product Benefits:**

EP-LAN allows remote locations or nodes to share Ethernet traffic as if they were all locally connected to the same in-building network. It is a service type for multipoint Layer-2 Virtual Private LANs (VPNs), transparent LAN service, and multicast networks.

**Geographic Availability:**

Integra's EP-LAN MAE service is available in the geographic areas described on Table 3.2.1.7 MAE Service Geographic Requirements in the SOW Technical Requirements document for Category 3 - MAN Ethernet, which consists of the following cities:

|                |           |                |               |                 |
|----------------|-----------|----------------|---------------|-----------------|
| Citrus Heights | Milpitas  | Pleasanton     | San Francisco | Santa Rosa      |
| Cotati         | Oakland   | Rancho Cordova | San Jose      | Sunnyvale       |
| Elk Grove      | Palo Alto | Rohnert Park   | San Rafael    | West Sacramento |
| Folsom         | Petaluma  | Sacramento     | Santa Clara   |                 |

**Service Limitations and Restrictions**

Integra's EP-LAN Metro Area Network Ethernet services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

**3.4.2 Extended Demarcation Wiring Services**

|  |
|--|
| <p><b>Contractor's Summary description of service:</b><br/>                 Extended Demarc wiring includes wiring and cable related activities required to extend the service demarcation point to the Customer defined termination location or cross-connect point from the Contractor's Minimum Point of Entry (MPOE).<br/>                 Extended Demarc wiring shall include all necessary hardware including wire and/or cable, connectors, jumpers, patch panels, minor materials and jacks. Extended Demarc wiring shall also include all necessary labor required to complete the provisioning of service including installation, testing, trouble shooting, labeling and documentation.<br/>                 Extended Demarc wiring is limited to the following:<br/>                 1. Installation of cabling for extending services from the MPOE location to the Customer's point of utilization;<br/>                 2. Installation of cross-connects or rearrangement of existing jumpers;<br/>                 3. Identification and testing of existing cabling beyond the MPOE to the Customer's equipment location; or,<br/>                 4. Testing, trouble shooting, labeling and completing documentation.</p> |
| <p><b>Geographic Availability:</b><br/>                 Integra will provide Extended Demarcation (Extended Demarc) wiring to support the services covered by this contract for all Customer occupied buildings where services under this Contract are being offered.</p>  |
| <p><b>Service Limitations and Restrictions</b><br/> <i>Integra's Extended Demarcation Wiring Services require a no-cost customer consultation regarding specific wiring requirements prior to finalizing a service order and implementation.</i></p>   |
| <p><b>Change Charge Applicability:</b><br/>                 N/A</p>  |

**3.4.3 Services Related Hourly Support**

**Contractor's Summary description of service:**  
Work performed under this section is authorized only for situations where the Contractor has dispatched personnel to diagnose a service problem that is discovered to be caused by factors outside the responsibility of the Contractor or no trouble is found.

**Geographic Availability:**  
Integra will provide labor for the diagnosis and/or repair of services covered by this contract for all Customer occupied buildings where services under this Contract are being offered.

**Service Limitations and Restrictions**

**Change Charge Applicability:**  
N/A

# SOW Technical Requirements

## Category 5 – MANAGED INTERNET SERVICES

### 5.1 OVERVIEW

This Category 5 IFB provides the State's solicitation for best value solutions for managed Internet services. This IFB describes the CALNET 3 technical requirements necessary to support the CALNET 3 program requirements.

This IFB will be awarded to Bidders that meet the award criteria as described in IFB Section 4. The CALNET 3 Contract(s) that result from the award of this IFB will be managed on a day-to-day basis by the CALNET 3 Contract Management and Oversight (CALNET 3 CMO).

#### 5.1.1 BIDDER RESPONSE REQUIREMENTS

Throughout this IFB, Bidders are required to acknowledge acceptance of the requirements described herein by responding to one (1) of the following:

Example A (for requirements that require confirmation that the Bidder understands and accepts the requirement):

*“Bidder understands the Requirement and shall meet or exceed it? Yes \_\_\_\_\_  
No \_\_\_\_\_”*

Or,

Example B (for responses that require the Bidder to provide a description or written response to the requirement):

*“Bidder understands the requirements in Section xxx and shall meet or exceed them? Yes \_\_\_\_\_ No \_\_\_\_\_”*

*Description:”*

#### 5.1.2 DESIGNATION OF REQUIREMENTS

All Technical Requirements specified in this IFB Section are Mandatory and must be responded to as identified in IFB Section 3.4.2.5 by the Bidder. Additionally, some Mandatory requirements are “Mandatory-Scorable” and are designated as “(M-S)”. The State will have the option of whether or not to include each item in the Contract, based on the best interest of the State. Furthermore, Customers will have the option whether or not to order services or features included in the Contract. Service Requests for some CALNET 3 services or features may require CALNET 3 CMO approval.

Costs associated with services shall be included in the prices provided by the Bidder for the individual items included in the Cost Worksheets. Items not listed in the Cost Worksheets will not be billable by the Contractor. If Bidder provided unsolicited items include features described in the IFB requirements and are not billable in the Cost Worksheets, the cost associated with the features shall not be included in the unsolicited service unless it represents an unbundling of the mandatory service.

Services and features included in the Cost Worksheets are those that the Bidder must provide. All Bidders must provide individual prices as indicated in the Cost Worksheets in the Bidder's Final Proposal. Items submitted with no price will be considered as offered at no cost.

### **5.1.3 PACIFIC TIME ZONE**

Unless specific otherwise, all times stated herein are times in the Pacific Time Zone.

## **5.2 *MANAGED INTERNET SERVICE***

The Contractor shall provide dedicated Internet access service that provides high-speed Internet access through communications facilities managed by the Contractor.

**Bidder shall describe in detail the high-speed Internet access service(s) that will be provided under this Contract.**

**When describing the full suite of services offered, bidders should clearly indicate and differentiate those services that will be used to meet the minimum requirements and those services that are offered as unsolicited.**

*Bidder understands the requirements in Section 5.2 and shall meet or exceed them? Yes   X   No \_\_\_\_\_*

*Description:*

*Integra's internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone.*

*The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity is 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry.*

*We offer internet services via many access types. Some of those are DSL, Bonded DSL, T1, NxT1, DS3, OC3 through OC192 and all Ethernet bandwidths from 1 Meg to 10 Gig. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces.*

*We also provide other Internet services and features such as: Firewall (Cloud), IPV6 support, Distributed Denial of Service (DDoS) mitigation and ISP services such as hosted mail servers.*

### **5.2.1 INTERNET SERVICES GENERAL REQUIREMENTS**

The Contractor's network shall connect a Customer's Local Area Network (LAN) or application to the Internet by providing highly reliable transport and Internet Protocol (IP) connectivity. The service shall use the Transmission Control Protocol/Internet Protocol (TCP/IP) to interconnect customer premise equipment (CPE) to the public Internet Service Provider (ISP) networks.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X   No \_\_\_\_\_*

### **5.2.2 NETWORK CAPABILITIES**

The Contractor's network shall have:

1. Established public peering arrangements from the Contractor's network to the Internet.
2. Private peering arrangements established from the Contractor's network with redundant links to connect to its private peering partners.

---

 Volume 2: Category 5 – Managed Internet Services
 

---

3. Support for Customer assigned and Internet Corporation for Assigned Names and Numbers (ICANN) registered IP addresses and domain names.
4. Primary and Secondary Domain Name Service (DNS) to provide an authoritative name server for the Customer.

The Contractor shall provide support for the border gateway protocol (BGP) for Customers with registered Autonomous System (AS) numbers.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

### 5.2.2.1 Standards

Dedicated Internet Services shall comply with the following standards, as applicable, and when commercially available by the Contractor:

1. Internet Engineering Task Force (IETF) Requests for Comments (RFCs);
2. ANSI T1;
3. ITU TSS Recommendations;
4. ATM Forum;
5. Frame Relay Forum implementation agreements;
6. North American ISDN Users Forum (NIUF);
7. IEEE
  - a. 802.10;
  - b. 802.1P; and
  - c. 802.3AD.
8. Metro Ethernet Forum (MEF);
9. IETF RFCs for IPv6 when offered commercially by the Contractor; and
10. All new versions, amendments, and modifications to the above documents and standards as they become commercially available.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

## 5.2.3 NETWORK OPERATIONS AND MANAGEMENT

### 5.2.3.1 General Description

The Contractor's data network(s) shall meet established industry standards.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

### **5.2.3.2 Network Operations Center**

The Contractor shall maintain a Network Operations Center (NOC) that is staffed 24x365 that coordinates and manages all data traffic.

The NOC shall perform the following services:

1. Network surveillance;
2. Fault management (trouble identification, isolation and notification); and,
3. Monitor network performance in near real-time to identify capacity blockages and implement controls to optimize network health and performance immediately.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

### **5.2.3.3 Security**

#### **5.2.3.3.1 Physical Access**

Contractor shall physically secure all data and networking facilities through which data traverses Contractor's WAN complying with the physical security controls of NIST SP 800-53, ISO/IEC 27001, or equivalent standards.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

#### **5.2.3.3.2 Network Security**

The Contractor's network security solution shall incorporate the following features:

1. The Contractor's network equipment locations and data centers shall use carrier grade platforms; and,
2. All equipment shall be in a hardened facility and all unnecessary services shall be disabled or removed.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.2.3.3.3 Security Event Notifications**

The Contractor shall provide the designated State representatives with notifications of suspected and real security violations that impact CALNET 3 Customers within one (1) hour of such determination via telephonic means or email.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.2.4 DEDICATED INTERNET FLAT RATE SERVICES TECHNICAL REQUIREMENTS**

The service shall connect a Customer’s LAN or application to the Internet by providing highly reliable transport and IP connectivity to the internet.

**The speeds in the Feature Names in Table 5.2.4.1.b indicate download speeds. Bidder shall indicate the upload speeds in the Bidder’s Product Description in Table 5.2.4.1.b, Table 5.2.4.2.b and in Catalog A, Column E (Feature Restrictions, Limitations and Additional Information).**

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.2.4.1 Internet Flat Rate Service (InFRa)**

The Contractor shall provide Internet Flat Rate Service (InFRa) at the speeds identified in Table 5.2.4.1.b. The services shall consist of a dedicated Internet port and transport from the Customer site to the nearest Contractor Point-of-Presence (POP). The service shall include all equipment, cabling and labor required to provide a User-to-Network Interface (UNI) at the Customer premise Minimum Point of Entry (MPOE). The Contractor shall describe the User-to-Network Interface characteristics in the rows provided in Table 5.2.4.1.b using Table 5.2.4.1.a as a guide. Table 5.2.4.1.a is a guide only. Contractors shall follow the format as closely as possible if the guide content does not align with a particular Contractor technology or offering.

**Table 5.2.4.1.a – InFRa UNI Guide**

|   | Interface/Access Type                     | Network-Side Interface  | Protocol          |
|---|---|---|-------------------|
| 1 | Asynchronous Transfer Mode Service (ATMS) | <ol style="list-style-type: none"> <li>1. T1</li> <li>2. T3</li> <li>3. OC-3c</li> <li>4. OC-12c</li> </ol> | IPv4/v6 over ATMS |

## Volume 2: Category 5 – Managed Internet Services

**Table 5.2.4.1.a – InFRa UNI Guide**

|   | <b>Interface/Access Type</b> | <b>Network-Side Interface</b>  | <b>Protocol</b>                  |
|---|------------------------------|--|----------------------------------|
| 2 | Cable High Speed Access      | N/A  | Point-to-Point Protocol, IPv4/v6 |
| 3 | Ethernet Interface           | <ol style="list-style-type: none"> <li>1. 1 Mbps up to 1 GbE (Gigabit Ethernet)</li> <li>2. 10 GbE</li> </ol>  | IPv4/v6 over Ethernet            |
| 4 | Frame Relay Service (FRS)    | <ol style="list-style-type: none"> <li>1. Fractional T1</li> <li>2. T1</li> <li>3. Fractional T3</li> <li>4. T3</li> </ol>   | IPv4/v6 over FRS                 |
| 5 | IP over SONET Service        | <ol style="list-style-type: none"> <li>1. OC-3c</li> <li>2. OC-12c</li> <li>3. OC-48c</li> <li>4. OC-192c</li> </ol>   | IP/PPP over SONET                |
| 6 | Private Line Service (PLS)   | <ol style="list-style-type: none"> <li>1. Fractional T1</li> <li>2. T1</li> <li>3. Fractional T3</li> <li>4. T3</li> <li>5. OC-3c</li> <li>6. OC-12c</li> <li>7. OC-48c</li> <li>8. OC-192c</li> </ol> | IPv4/v6 over PLS                 |
| 7 | DSL Service                  | xDSL access  | Point-to-point protocol, IPv4/v6 |

The Contractor shall offer the InFRa Services detailed in Table 5.2.4.1.b. Bidders shall identify the Interface/Access Type(s), Network Side Interface(s) (if applicable), and the Protocol(s) applicable to each speed listed in Table 5.2.4.1.b. Bidders must provide at least one (1) service/solution for each InFRa speed listed in Table 5.2.4.1.b. Additional Internet Flat Rate Services that utilize different UNI's with different product identifiers and associated costs should be listed in an Unsolicited table in the same fashion as Table 5.2.4.1.b.

**Table 5.2.4.1.b – Internet Flat Rate Service**

|  | Feature Name      | Feature Description  | Bidder Meets or Exceeds? |   | Bidder's Product Identifier |
|--|-------------------|--|--------------------------|---|-----------------------------|
|  |                   |  | Y                        | N |                             |
| 1  | InFRa @ 1.544Mbps | Internet Flat Rate Service (InFRa) at 1.544Mbps. Includes dedicated Internet port and transport. | Y                        |   | 501001                      |
| Bidder's Product Description:<br><i>Delivery of a T1 (with 1.544Mbps upload speeds) via HDSL2 or special access or its equivalent is provided. T1 access to the dedicated domain (VRF) is very typical for this product. The electronics may change based on the specific access method on which the product is offered.</i> |                   |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>   |                   |  |                          |   |                             |
| Network Side Interface:<br><i>T1, HDSL2, Ethernet over Copper or Ethernet over TDM (Synchronous/bidirectional)</i>   |                   |  |                          |   |                             |
| Protocol:<br><i>802.3 at layer 2, IP V4 at layer 3; routing protocol is PPP or Static.</i>   |                   |  |                          |   |                             |

## Volume 2: Category 5 – Managed Internet Services

Table 5.2.4.1.b – Internet Flat Rate Service

|  | Feature Name  | Feature Description  | Bidder Meets or Exceeds? |   | Bidder's Product Identifier |
|--|---------------|--|--------------------------|---|-----------------------------|
|  |               |  | Y                        | N |                             |
| 2  | InFRa @ 2Mbps | Internet Flat Rate Service (InFRa) at 2Mbps. Includes dedicated Internet port and transport. | Y                        |   | 501002                      |
| Bidder's Product Description:<br><i>Delivery of NxT1 via HDSL2 or special access or its equivalent is provided to deliver 2Mbps upload speeds. T1 access to the dedicated domain (VRF) is very typical for this product. Bonding of T1 access for larger bandwidths up to 12.352 is a standard service for this product. The electronics may change based on the specific access method on which the product is offered.</i> |               |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>   |               |  |                          |   |                             |
| Network Side Interface:<br><i>T1, HDSL2, Ethernet over Copper or Ethernet over TDM (Synchronous/bidirectional)</i>   |               |  |                          |   |                             |
| Protocol:<br><i>802.3 at layer 2, IP V4 at layer 3; routing protocol is PPP or Static.</i>   |               |  |                          |   |                             |
| 3  | InFRa @ 3Mbps | Internet Flat Rate Service (InFRa) at 3Mbps. Includes dedicated Internet port and transport. | Y                        |   | 501003                      |
| Bidder's Product Description:<br><i>Delivery of NxT1 via HDSL2 or special access or its equivalent is provided to deliver 3Mbps upload speeds. T1 access to the dedicated domain (VRF) is very typical for this product. Bonding of T1 access for larger bandwidths up to 12.352 is a standard service for this product. The electronics may change based on the specific access method on which the product is offered.</i> |               |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>   |               |  |                          |   |                             |
| Network Side Interface:<br><i>T1, HDSL2, Ethernet over Copper or Ethernet over TDM (Synchronous/bidirectional)</i>   |               |  |                          |   |                             |
| Protocol:<br><i>802.3 at layer 2, IP V4 at layer 3; routing protocol is PPP or Static.</i>   |               |  |                          |   |                             |

## Volume 2: Category 5 – Managed Internet Services

**Table 5.2.4.1.b – Internet Flat Rate Service**

|  | Feature Name    | Feature Description  | Bidder Meets or Exceeds? |   | Bidder's Product Identifier |
|--|-----------------|--|--------------------------|---|-----------------------------|
|  |                 |  | Y                        | N |                             |
| <b>4</b>   | InFRa @ 4Mbps   | Internet Flat Rate Service (InFRa) at 4Mbps. Includes dedicated Internet port and transport.   | <b>Y</b>                 |   | 501004                      |
| Bidder's Product Description:<br><i>Delivery of NxT1 via HDSL2 or special access or its equivalent is provided to deliver 4Mbps upload speeds. T1 access to the dedicated domain (VRF) is very typical for this product. Bonding of T1 access for larger bandwidths up to 12.352 is a standard service for this product. The electronics may change based on the specific access method on which the product is offered.</i>   |                 |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>   |                 |  |                          |   |                             |
| Network Side Interface:<br><i>T1, HDSL2, Ethernet over Copper or Ethernet over TDM (Synchronous/bidirectional)</i>   |                 |  |                          |   |                             |
| Protocol:<br><i>802.3 at layer 2, IP V4 at layer 3; routing protocol is PPP or Static.</i>   |                 |  |                          |   |                             |
| <b>5</b>   | InFRa @ 4.5Mbps | Internet Flat Rate Service (InFRa) at 4.5Mbps. Includes dedicated Internet port and transport. | <b>Y</b>                 |   | 501005                      |
| Bidder's Product Description:<br><i>Delivery of NxT1 via HDSL2 or special access or its equivalent is provided to deliver 4.5Mbps upload speeds. T1 access to the dedicated domain (VRF) is very typical for this product. Bonding of T1 access for larger bandwidths up to 12.352 is a standard service for this product. The electronics may change based on the specific access method on which the product is offered.</i> |                 |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>   |                 |  |                          |   |                             |
| Network Side Interface:<br><i>T1, HDSL2, Ethernet over Copper or Ethernet over TDM (Synchronous/bidirectional)</i>   |                 |  |                          |   |                             |
| Protocol:<br><i>802.3 at layer 2, IP V4 at layer 3; routing protocol is PPP or Static.</i>   |                 |  |                          |   |                             |

## Volume 2: Category 5 – Managed Internet Services

Table 5.2.4.1.b – Internet Flat Rate Service

|   | Feature Name  | Feature Description  | Bidder Meets or Exceeds? |   | Bidder's Product Identifier |
|---|---------------|--|--------------------------|---|-----------------------------|
|   |               |  | Y                        | N |                             |
| 6   | InFRa @ 5Mbps | Internet Flat Rate Service (InFRa) at 5Mbps. Includes dedicated Internet port and transport. | Y                        |   | 501006                      |
| Bidder's Product Description:<br><i>Delivery of NxT1 via HDSL2 or special access or its equivalent is provided to deliver 5Mbps upload speeds. T1 access to the dedicated domain (VRF) is very typical for this product. Bonding of T1 access for larger bandwidths up to 12.352 is a standard service for this product. The electronics may change based on the specific access method on which the product is offered.</i>  |               |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>  |               |  |                          |   |                             |
| Network Side Interface:<br><i>T1, HDSL2, Ethernet over Copper or Ethernet over TDM (Synchronous/bidirectional)</i>  |               |  |                          |   |                             |
| Protocol:<br><i>802.3 at layer 2, IP V4 at layer 3; routing protocol is PPP or Static.</i>  |               |  |                          |   |                             |
| 7   | InFRa @ 6Mbps | Internet Flat Rate Service (InFRa) at 6Mbps. Includes dedicated Internet port and transport. | Y                        |   | 501007                      |
| Bidder's Product Description:<br><i>Delivery of NxT1 via HDSL2 or special access or its equivalent is provide1 to deliver 6Mbps upload speeds. T1 access to the dedicated domain (VRF) is very typical for this product. Bonding of T1 access for larger bandwidths up to 12.352 is a standard service for this product. The electronics may change based on the specific access method on which the product is offered..</i> |               |  |                          |   |                             |
| Interface/Access Type:<br><i>10/100Base-T RJ48 Ethernet jack</i>  |               |  |                          |   |                             |

### 5.2.4.2 Internet Flat Rate with Managed Router Service (InFRaM)

The Contractor shall provide Internet Flat Rate with Managed Router Service at the speeds identified in Table 5.2.4.2.b. The services shall consist of a dedicated Internet Port and Transport from the Customer site to the nearest contractor POP. The service shall include all equipment, cabling and labor required to provide a UNI at the Customer premise MPOE and a Contractor owned, maintained and managed router.

The service shall include a Contractor owned, maintained and managed router. **Bidder shall provide a description of the type of equipment, maintenance and management services that the Contractor will deploy to satisfy this requirement.**

All Bidder equipment, tasks and services required for provisioning of the services described in Table 5.2.4.2.b will be included in the charges for the features/services listed in those tables unless specifically identified as not part of the mandatory service and proposed in Tables 5.2.4.2.c.

The Contractor's managed router service shall include proactive Customer notification as identified in the Service Level Agreements.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*

*No \_\_\_\_\_*

## Volume 2: Category 5 – Managed Internet Services

**Description:**

*Integra will supply a router for each circuit that is ordered with a managed router. The physical CPE provided will have the following characteristics:*

| <b>Table 5.2.4.2 – Internet Flat Rate with Managed Router Service (InFRaM) Characteristics</b> |                    |                                 |   |   |                                      |
|--|--------------------|---------------------------------|---|---|--------------------------------------|
| <b>Access Type</b>   | <b>Bandwidth</b>   | <b>Access Interface</b>         | <b>Customers Interface (NI)</b>                             | <b>CPU throughput</b>                         | <b>RAM</b>                           |
| <b>T1</b>  | 128 to 1.544mbs    | 1xT1                            | 10/100/1000base-T   | 30 Mbs  | Amount to support all routing tables |
| <b>(2) T1 to (8) T1</b>  | 3.088 to 12.352mbs | 2-8xT1                          | 10/100/1000base-T   | 30 Mbs  | Amount to support all routing tables |
| <b>DS3</b>   | 15 to 45mb         | DS3                             | 10/100/1000base-T   | 90 Mbs  | Amount to support all routing tables |
| <b>Ethernet</b>  | 10 to 100mb        | 10/100/1000base-T               | 10/100/1000base-T   | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>Ethernet</b>  | 101 to 1000mb      | 10/100/1000base-T               | 10/100/1000base-T   | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>Ethernet</b>  | 1001 to 10,000mb   | 10/100/1000base-T or 10GBASE-xx | 10/100/1000base-T or 10GBASE-xx                             | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>   | 155mbs             | OC-3 SONET                      | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>   | 620mbs             | OC-12 SONET                     | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>   | 2480mbs            | OC-48 SONET                     | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |

*Each router will have a modem installed and attached to an analog telephone line for an alternate remote access. The routers will be configured by Integra operations staff and will be monitored on a continual basis. Integra will manage, maintain, configure, archive and upgrade a managed router as part of the service. The router remains the property of Integra.*

## Volume 2: Category 5 – Managed Internet Services

**The Bidder shall identify the User-to-Network Interface characteristics in the rows provided in Table 5.2.4.2.b using Table 5.2.4.2.a as a guide.**

**Table 5.2.4.2.a – InFRaM UNI Guide**

|   | <b>Interface/Access Type</b>              | <b>Network-Side Interface</b>  | <b>Protocol</b>                  |
|---|---|--|----------------------------------|
| 1 | Asynchronous Transfer Mode Service (ATMS) | <ol style="list-style-type: none"> <li>1. T1</li> <li>2. T3</li> <li>3. OC-3c</li> <li>4. OC-12c</li> </ol>  | IPv4/v6 over ATMS                |
| 2 | Cable High Speed Access                   | N/A  | Point-to-Point Protocol, IPv4/v6 |

| 7 | DSL Service                               | xDSL access  | Point-to-point protocol, IPv4/v6 |

The Contractor shall offer the InFRaM Services detailed in Table 5.2.4.2.b. **Bidders shall include the Interface/Access Type(s), Network Side Interface(s) (if applicable), and the Protocol(s) applicable to each speed listed in Table 5.2.4.2.b. Bidders must provide at least one (1) solution for each InFRaM speed listed in Table 5.2.4.2.b.**

**5.2.5 INTERNET SUSTAINED BANDWIDTH ETHERNET SERVICE (InSBE)**

The Contractor shall provide Internet Sustained Bandwidth Ethernet Service (InSBE). The service shall consist of a separately provisioned dedicated Internet port and transport from the Customer site to the nearest Contractor POP.

Service shall allow Customers to order Ethernet access at a specific data rate and to select a minimum monthly bandwidth commitment. Customers then pay an additional fee for sustained usage above the minimum commitment. Service shall allow Customers to "burst" up to the full capacity of the data rate assigned to the transport when needed.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.2.5.1 Internet Sustained Bandwidth Ethernet Transport Service (InSBET)**

The Internet Sustained Bandwidth Ethernet Transport Service (InSBET) transport service shall include all equipment, cabling and labor required to provide a User-to-Network Interface (UNI) at the Customer premise MPOE.

Transport shall be provisioned at the data rates listed in Table 5.2.5.1.b. The assigned data rate shall be the maximum data rate a Customer may burst up to.

This service shall be provisioned in conjunction with Customer and Contractor owned, maintained and managed router options as identified in Section 5.2.5.2 (InSBEP) and Section 5.2.5.3 (InSBEPM).

The service shall provide the User-to-Network Interface characteristics listed in Table 5.2.5.1.a.

**Table 5.2.5.1.a – UNI Type**

|   | Interface/Access Type | Network-Side Interface  | Protocol              |
|---|-----------------------|---|-----------------------|
| 1 | Ethernet Interface    | <ol style="list-style-type: none"> <li>1. 1 Mbps up to 1 GbE (Gigabit Ethernet)</li> <li>2. 10 GbE</li> </ol> | IPv4/v6 over Ethernet |

*Bidder understands the Requirement and shall meet or exceed it? Yes   X

The electronics may change based on the specific access method on which the product is offered. The maximum bandwidth is set to 10,000 Mbps and is re-configurable when amended by an order. The minimum monthly commitment is 10,000 Mbps.</i> |  |  |                          |   |                             |

**Bidders may offer additional unsolicited InSBET services in Table 5.2.5.1.c.**

### 5.2.5.2 Internet Sustained Bandwidth Ethernet Port Service (InSBEP)

Contractor shall provide Internet Sustained Bandwidth Ethernet Port Service. Contractor shall provide an Internet port configuration that allows Customers to select a monthly minimum bandwidth commitment. Customers then pay an additional incremental usage charge for sustained usage above the monthly minimum bandwidth commitment. Service shall allow Customers to "burst" up to the full capacity of the InSBET when needed. This service shall be provisioned in conjunction with a Customer owned router.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

**5.2.5.2.1 InSBEP Minimum Bandwidth Commitment**

Contractor shall provide InSBEP Minimum Bandwidth Commitment port configuration that allows Customers to select a monthly minimum bandwidth commitment as described in Table 5.2.5.2.a.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

**5.2.5.2.2 InSBEP Additional Incremental Usage Charge for Sustained Usage**

Contractor may charge an incremental usage charge for sustained usage above the minimum bandwidth commitment speed identified.

Contractor shall calculate sustained usage as follows:

1. Poll Access Router every five (5) minutes and collect two (2) readings (average Octets in and Octets out over the five (5) minute period);
2. Both averages become data points (a total of 17,280 in a 30 day bill cycle) that are tracked over the Customer's monthly billing cycle;
3. All 17,280 data points are ranked in ascending order;
4. Discard the highest five (5) percentiles (or 864 measurements in a 30 day bill cycle); and
5. The remaining ninety-fifth percentile is the Sustained Usage value for billing purposes.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

**5.2.5.3 Internet Sustained Bandwidth Ethernet Port with Managed Router Service (InSBEPM)**

Contractor shall provide Internet Sustained Bandwidth Ethernet Port with Managed Router Service. Contractor shall provide a port configuration that allows Customers to select a monthly minimum bandwidth commitment. Customers then pay an additional incremental usage charge for sustained usage above the monthly minimum bandwidth commitment. Service shall allow Customers to "burst" up to the full capacity of the InSBET when needed.

The service shall include a Contractor owned, maintained and managed router. **Bidder shall provide a description of the type of equipment, maintenance and management services that the Contractor will deploy to satisfy this requirement.**

All Bidder equipment, tasks and services required for provisioning of the services described in Tables 5.2.5.3.a and 5.2.5.3.b will be included in the charges for the features/services listed in those tables unless specifically identified as not part of the mandatory service and proposed in Tables 5.2.5.3.c.

The Contractors managed router service shall include proactive Customer notification as identified in the Service Level Agreements.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

*Description:*

*Integra will supply a router for each circuit that is ordered with a managed router. The physical CPE provided will have the following characteristics:*

| <b>Table 5.2.5.3 - Internet Sustained Bandwidth Ethernet Port with Managed Router Service (InSBEPM)</b> |                           |                         |                                 |                       |   |

| <b>Ethernet</b>   | 10 to 100mb      | 10/100/1000base-T               | 10/100/1000base-T   | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>Ethernet</b>   | 101 to 1000mb    | 10/100/1000base-T               | 10/100/1000base-T   | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>Ethernet</b>   | 1001 to 10,000mb | 10/100/1000base-T or 10GBASE-xx | 10/100/1000base-T or 10GBASE-xx                             | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>  | 155mbs           | OC-3 SONET                      | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>  | 620mbs           | OC-12 SONET                     | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |
| <b>SONET</b>  | 2480mbs          | OC-48 SONET                     | 10/100/1000base-T or 10GBASE-xx (or direct SONET if needed) | Configured to handle the maximum assess link. | Amount to support all routing tables |

Each router will have a modem installed and attached to an analog telephone line for an alternate remote access. The routers will be configured by Integra operations staff and will be monitored on a continual basis. Integra will manage, maintain, configure, archive and upgrade a managed router as part of the service. The router remains the property of Integra.

**5.2.5.3.1 InSBEPM Minimum Bandwidth Commitment**

Contractor shall provide InSBEPM Minimum Bandwidth Commitment port configuration that allows Customers to select a monthly minimum bandwidth commitment as described in Table 5.2.5.3. This service shall include a Contractor owned, maintained and managed router with service commitments as described in the Bidder's response to Section 5.2.5.3.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No\_\_\_\_\_*

**5.2.5.3.2 InSBEPM Additional Incremental Usage Charge for Sustained Usage**

Contractor may charge an incremental usage charge for sustained usage above the minimum bandwidth commitment speed identified.

Contractor shall calculate Sustained usage as follows:

6. Poll Access Router every 5 minutes and collect two (2) readings (average Octets in and Octets out over the five (5) minute period);
7. Both averages become data points (a total of 17,280 in a 30 day bill cycle) that are tracked over the Customer's monthly billing cycle;
8. All 17,280 data points are ranked in ascending order;
9. Discard the top 5% (or 864 measurements in a 30 day bill cycle); and
10. The highest remaining data point is the Sustained Usage value for billing purposes.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X

## 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS

Bidder shall identify the locations where their InFRa, InFRaM, InSBEP or InSBEPM Internet Services are available in Table 5.2.6.a. By indicating “X” in the table below, Contractor commits to provide the services in the cities identified below. Commitment is subject to facility availability either through Contractor owned facilities or third-party agreements. Bidders may reference Table 5.2.6.a or Table 5.2.6.b in their Catalog A, Geographic Availability response. Bidders Catalog A language shall not conflict with the requirements described herein.

**Table 5.2.6.a Internet Service Geographic Requirements**

|    | Service Location | InFRa | InFRaM | InSBET/InSBEP | InSBET/InSBEPM |
|----|------------------|-------|--------|---------------|----------------|
| 1  | Adelanto         |       |        |               |                |
| 2  | Agoura Hills     |       |        |               |                |
| 3  | Alameda          |       |        |               |                |
| 4  | Albany           |       |        |               |                |
| 5  | Alhambra         |       |        |               |                |
| 6  | Aliso Viejo      |       |        |               |                |
| 7  | Alturas          |       |        |               |                |
| 8  | Amador           |       |        |               |                |
| 9  | American Canyon  |       |        |               |                |
| 10 | Anaheim          |       |        |               |                |

**Bidder may identify additional locations in California where their InFRa, InFRaM, InSBEP or InSBEPM Internet Services are available** either through Contractor owned facilities or third-party agreements **in Table 5.2.6.b. Bidders shall list the product identifier for each location where the Contractor provides InFRa, InFRaM, InSBEP or InSBEPM. By listing the service location, the Bidder commits to provide service in that specific location.** Bidders may reference Table 5.2.6.a or Table 5.2.6.b in their Catalog A, Geographic Availability response. **If Bidder is unable to identify all service areas within Tables 5.2.6.a and 5.2.6.b, Bidder shall provide additional information in the form of a coverage map that includes unincorporated areas.**

| 7                |  |       |        |                   |                    |
| 8                |  |       |        |                   |                    |
| 9                |  |       |        |                   |                    |
| 10               |  |       |        |                   |                    |

**5.2.7 ADDITIONAL UNSOLICITED INTERNET SERVICES**

**5.2.7.1 Unsolicited Internet Services Product Descriptions**

**Bidder shall describe in detail the additional high-speed Internet access service(s) that will be provided under this Contract.**

All Bidder equipment, tasks and services required for provisioning of the services shall be identified in Table 5.2.7.a.

**Table 5.2.7.a – Cloud Firewall Service**

|  | Feature Name                             | Feature Description  | Bidder's Product Identifier |
|--|--|--|-----------------------------|
| <b>1</b>   | <i>Cloud Firewall Service Plus: 3 MB</i> | <i>Application and port based firewall including network Anti-Virus, Anti-Spyware and URL Filtering.</i> | 507036                      |
| <p><b>Bidder's Product Description:</b></p> <p><i>Integra's Cloud Firewall Service (CFS) protects business applications by guarding the perimeter of the network while providing inbound and outbound Internet access through a secure managed gateway. Our Cloud Firewall Service protects against unauthorized access to your network infrastructure, prohibits access to inappropriate web content, restricts downloads of infected files, and enables secure use of your network.</i></p> <p><i>This next generation firewall appliance is located logically between your private network and the internet. It is physically located in one of Integra's secure facilities and is fully redundant with multiple firewalls attached to core routers. The Cloud Firewall Service is based upon the industry leading Palo Alto Networks Next Generation Firewall platform. A secure web portal provides customer access to view and change firewall policies and features. Integra's Network Operations Center monitors the firewalls 24x7x365 by a team of security experts.</i></p> <p><b>Product Benefits:</b></p> <p><i>Uses next generation firewall technology to identify and control applications and content, increase your organizations productivity through URL filtering and increase network security with Network Anti-Virus and Anti Spyware. Integra's team of security experts keeps the firewall systems, virus and application definitions and other maintenance issues up to date freeing your IT staff to focus on more important projects.</i></p> |  |  |                             |

|    | <i>Cloud Firewall Service Plus: 750MB</i>   | <i>Application and port based firewall including network Anti-Virus, Anti-Spyware and URL Filtering.</i> | 507073                      |
| 38 | <p>Bidder's Product Description:</p> <p><i>Integra's Cloud Firewall Service (CFS) protects business applications by guarding the perimeter of the network while providing inbound and outbound Internet access through a secure managed gateway. Our Cloud Firewall Service protects against unauthorized access to your network infrastructure, prohibits access to inappropriate web content, restricts downloads of infected files, and enables secure use of your network.</i></p> <p><i>This next generation firewall appliance is located logically between your private network and the internet. It is physically located in one of Integra's secure facilities and is fully redundant with multiple firewalls attached to core routers. The Cloud Firewall Service is based upon the industry leading Palo Alto Networks Next Generation Firewall platform. A secure web portal provides customer access to view and change firewall policies and features. Integra's Network Operations Center monitors the firewalls 24x7x365 by a team of security experts.</i></p> <p><i>Product Benefits:</i></p> <p><i>Uses next generation firewall technology to identify and control applications and content, increase your organizations productivity through URL filtering and increase network security with Network Anti-Virus and Anti Spyware. Integra's team of security experts keeps the firewall systems, virus and application definitions and other maintenance issues up to date freeing your IT staff to focus on more important projects.</i></p> |  |                             |

Vulnerability exploits, buffer overflows, and port scans are detected using proven threat detection and prevention (IPS) mechanisms. The intrusion prevention engine is supported by a team of seasoned signature developers at Palo Alto Networks, who are active in the threat prevention community, performing ongoing research and working closely with software vendors, both informally and formally, through programs such as the Microsoft Active Protections Program (MAPP).</i></p> <p><i>Cloud Firewall Premium also adds File Filtering which controls the flow of a wide range of file types by looking deep within the payload to identify the file type (as opposed to looking only at the file extension) to determine if the transfer of the file is allowed by policy. File blocking by type can be implemented on a per application basis which can, for example, allow an organization to enable the use of specific webmail applications like Gmail but blocking a file attachment.</i></p> |  |                             |

**Table 5.2.7.a – Cloud Firewall Service**

|    | Feature Name  | Feature Description  | Bidder's Product Identifier |
|----|---|--|-----------------------------|
|    | <i>Cloud Firewall Service Premium: 10.5MB</i>   | <i>Application and port based firewall including network Anti-Virus , Anti-Spyware, URL Filtering, with Intrusion Detection System (IDS), Intrusion Protection System (IPS) and File Filtering</i> | 507086                      |
| 51 | <p><b>Bidder's Product Description:</b></p> <p><i>Integra's Cloud Firewall Service (CFS) protects business applications by guarding the perimeter of the network while providing inbound and outbound Internet access through a secure managed gateway. Our Cloud Firewall Service protects against unauthorized access to your network infrastructure, prohibits access to inappropriate web content, restricts downloads of infected files, and enables secure use of your network.</i></p> <p><i>This next generation firewall appliance is located logically between your private network and the internet. It is physically located in one of Integra's secure facilities and is fully redundant with multiple firewalls attached to core routers. The Cloud Firewall Service is based upon the industry leading Palo Alto Networks Next Generation Firewall platform. A secure web portal provides customer access to view and change firewall policies and features. Integra's Network Operations Center monitors the firewalls 24x7x365 by a team of security experts.</i></p> <p><b>Product Benefits:</b></p> <p><i>Uses next generation firewall technology to identify and control applications and content, increase your organizations productivity through URL filtering and increase network security with Network Anti-Virus and Anti Spyware. Integra's team of security experts keeps the firewall systems, virus and application definitions and other maintenance issues up to date freeing your IT staff to focus on more important projects.</i></p> <p><b>Premium:</b></p> <p><i>The premium offering adds Intrusion Detection and Protection (IDS/IPS) which is a requirement for any organization subject to Payment Card Industry (PCI) compliance standards. This includes a rich set of intrusion prevention features blocks known and unknown network and application-layer vulnerability exploits from compromising and damaging enterprise information resources. Vulnerability exploits, buffer overflows, and port scans are detected using proven threat detection and prevention (IPS) mechanisms. The intrusion prevention engine is supported by a team of seasoned signature developers at Palo Alto Networks, who are active in the threat prevention community, performing ongoing research and working closely with software vendors, both informally and formally, through programs such as the Microsoft Active Protections Program (MAPP).</i></p> <p><i>Cloud Firewall Premium also adds File Filtering which controls the flow of a wide range of file types by looking deep within the payload to identify the file type (as opposed to looking only at the file extension) to determine if the transfer of the file is allowed by policy. The Cloud Firewall Service is based upon the industry leading Palo Alto Networks Next Generation Firewall platform. A secure web portal provides customer access to view and change firewall policies and features. Integra's Network Operations Center monitors the firewalls 24x7x365 by a team of security experts.</i></p> <p><b>Product Benefits:</b></p> <p><i>Uses next generation firewall technology to identify and control applications and content, increase your organizations productivity through URL filtering and increase network security with Network Anti-Virus and Anti Spyware. Integra's team of security experts keeps the firewall systems, virus and application definitions and other maintenance issues up to date freeing your IT staff to focus on more important projects.</i></p> <p><b>Premium:</b></p> <p><i>The premium offering adds Intrusion Detection and Protection (IDS/IPS) which is a requirement for any organization subject to Payment Card Industry (PCI) compliance standards. This includes a rich set of intrusion prevention features blocks known and unknown network and application-layer vulnerability exploits from compromising and damaging enterprise information resources. Vulnerability exploits, buffer overflows, and port scans are detected using proven threat detection and prevention (IPS) mechanisms. The intrusion prevention engine is supported by a team of seasoned signature developers at Palo Alto Networks, who are active in the threat prevention community, performing ongoing research and working closely with software vendors, both informally and formally, through programs such as the Microsoft Active Protections Program (MAPP).</i></p> <p><i>Cloud Firewall Premium also adds File Filtering which controls the flow of a wide range of file types by looking deep within the payload to identify the file type (as opposed to looking only at the file extension) to determine if the transfer of the file is allowed by policy. File blocking by type can be implemented on a per application basis which can, for example, allow an organization to enable the use of specific webmail applications like Gmail but blocking a file attachment.</i></p> |  |                             |

**Table 5.2.7.b – DDoS Mitigation Feature**

| Feature Name  | Feature Description   |
|---|---|
| <p><i>DDoS Mitigation 1.544 Mbps through over 10 Gbps</i></p>   | <p><i>Distributed Denial of Service Mitigation (Reactive Feature) for dedicated Internet bandwidths from 1.544 Mbps to over 10 Gbps</i></p> |
| <p><b>Bidder’s Feature Description:</b><br/> <i>The DDoS Mitigation feature is used on your Integra-provided Managed Internet Service (MIS) as a network based feature for 1.544 Mbps through 10 Gbps MIS. The feature will help protect your network from Distributed Denial of Service attacks from the Internet. Once purchased, Integra will monitor your interface(s) and establish a shifting baseline of your normal network traffic. Establishing the complete baseline of your normal traffic requires 30 days, and is constantly updated. This baseline provides a fingerprint of your traffic before an attack occurs. This baseline is used to compare current traffic and will aid in determining the appropriate mitigating response.</i></p> <p><i>DDoS Mitigation from Integra is reactive in nature and is activated upon customer notification to our network operations center. The reactive feature keeps the customer in control of which traffic is allowed, and which is classified as a DDoS attack. The customer alone decides when they believe they are under a cyber-attack.</i></p> <p><i>A mitigation event begins when Integra responds to the trouble ticket opened by the customer. Integra engineers will confirm that an attack is in progress, and Integra will reroute your traffic through our scrubbing center where your traffic will be filtered by sophisticated tools, leaving normal traffic flowing into your network. Once the attack has stopped, a normalization period begins – a period of 24 hours during which your traffic is monitored for normal activity. A mitigation event ends following the 24-hour normalization period if the attack has not re-started and if normal traffic is flowing.</i></p> <p><b>Feature Details:</b></p> <ul style="list-style-type: none"> <li><i>• This is an optional feature. Integra will mitigate DDoS attacks only for Internet bandwidth purchased from Integra where a baseline has been established. The MIS and DDoS Mitigation bandwidth amounts must match.</i></li> <li><i>• Integra requires 30 days following the DDoS Mitigation feature installation to establish the customer’s traffic baseline profile.</i></li> <li><i>• Integra requires a customer-provided list of potential IP target objects to establish the normal baseline traffic pattern. Integra will provide a form to complete.</i></li> <li><i>• The customer will need to open a trouble ticket with the Integra NOC when they suspect a DDoS attack is in progress.</i></li> <li><i>• Integra will respond to the customer trouble ticket within 15 minutes from 8:00 am-5:00 pm Monday through Friday Pacific time (excluding holidays) and within 30 minutes at all other times</i></li> <li><i>• Once an attack is identified, customer traffic will be rerouted to the Integra scrubbing center only after customer approval is given.</i></li> <li><i>• When the attack subsides and the 24-hour normalization period is complete, customer traffic will be routed back to the normal traffic flow at a time agreed upon by both parties.</i></li> <li><i>• DDoS Mitigation process will employ any and all skills and tools available to determine the type of attack and the quickest way to isolate the customer’s circuit from unwanted cyber-attacks.</i></li> </ul> <p><b>Pricing:</b> <i>DDoS Mitigation has three distinct pricing elements:</i></p> <ol style="list-style-type: none"> <li><i>1. A single monthly recurring charge (MRC) applies to establish the baseline traffic patterns per bandwidth monitored, and for the mitigations per month a customer would like to include (options include: up to 5 mitigations per month, up to 10 mitigations per month, up to 15 mitigations per month, up to 20 mitigations per month, over 20 mitigations per month, unlimited mitigations per month, and 0 mitigations per month, where a customer purchases the “Baseline Only” option, and then pays for each mitigation as needed.)</i></li> <li><i>2. Customers may increase the number of mitigations per month at any time. Customers may decrease the number of mitigations per month once per calendar quarter. Increases and decreases will result in a new MRC. No change charge applies to these changes.</i></li> <li><i>3. If the number of mitigations exceeds the amount chosen by the customer in a given month, a per-mitigation charge will apply.</i></li> </ol> |   |

**Page intentionally left blank.**

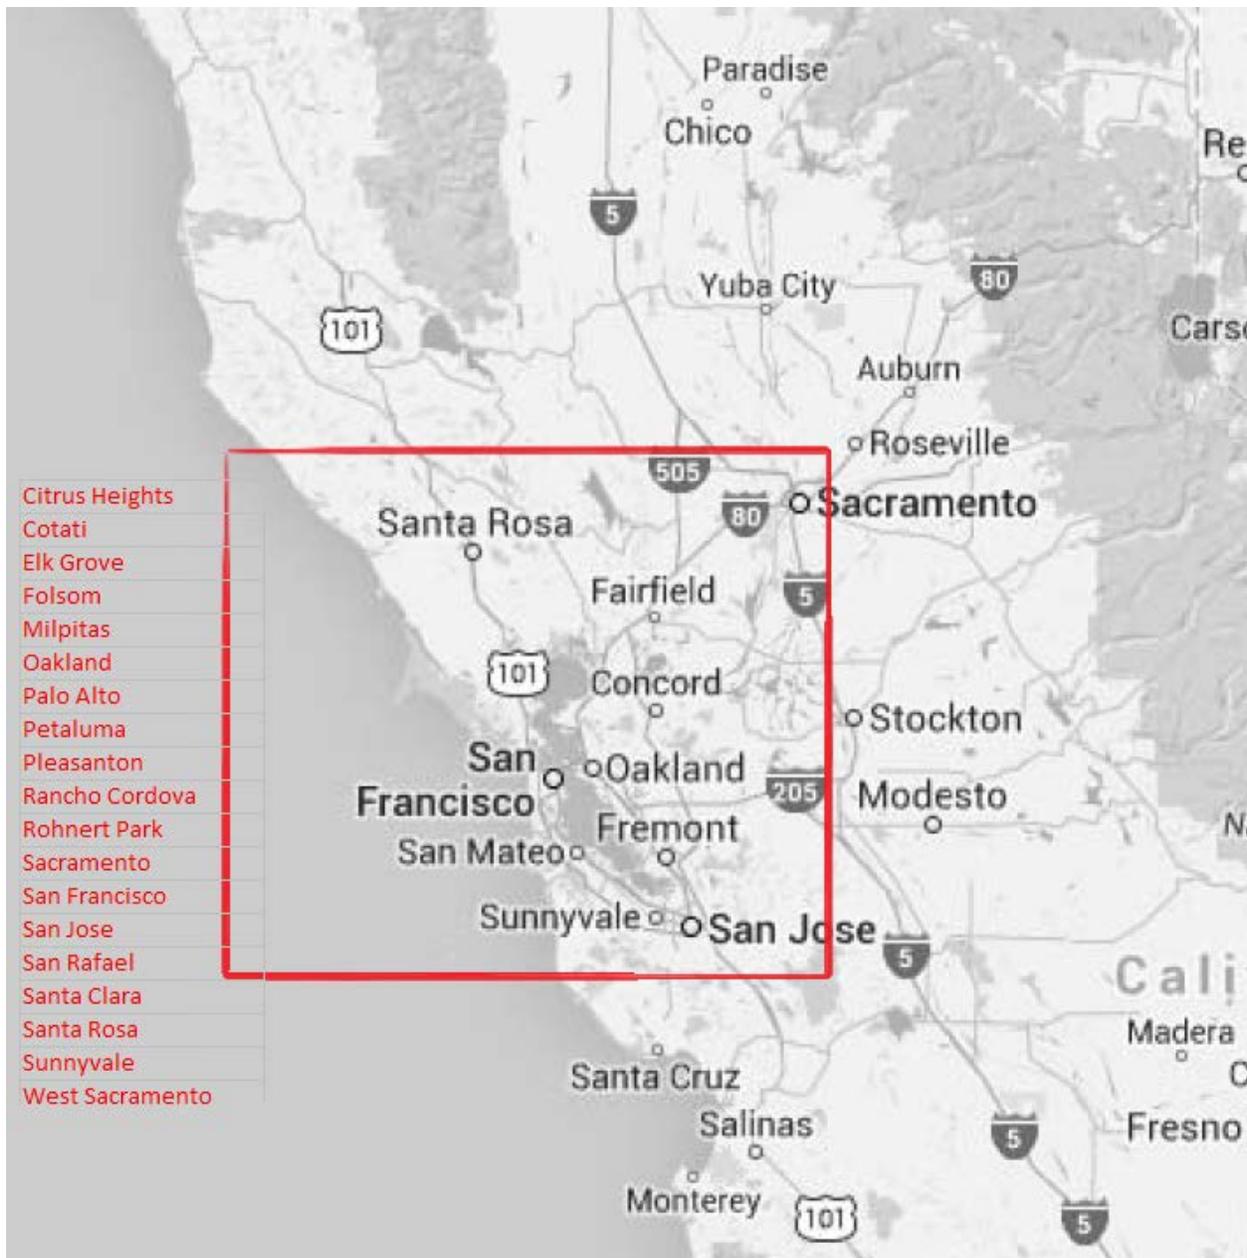

### 5.2.7.2 Unsolicited Internet Services Geographic Coverage

**Bidder shall provide a coverage map for each Unsolicited service offered in Table 5.2.7.a. A single map may be provided for services that fall within the same geographic footprint.**

*Bidder understands the requirements in Section 5.2.7.2 and shall meet or exceed them? Yes  No*

*Description:*

*Integra's unsolicited Internet services described in Table 5.2.7.a has the same geographic coverage area as identified for the solicited services in Table 5.2.6.a.*

**5.3 NETWORK DISASTER/OPERATIONAL RECOVERY**

**5.3.1 TELECOMMUNICATIONS SERVICE PRIORITY (TSP) PROGRAM**

The Contractor shall comply with the Telecommunications Service Priority (TSP) Program, a Federal Communications Commission (FCC) mandate for prioritizing service requests by identifying those services critical to National Security and Emergency Preparedness (NS/EP) and be in compliance with all related CPUC and FCC requirements.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.3.2 DATA NETWORK DISASTER/OPERATIONAL RECOVERY**

Public safety agencies, major data centers, agencies with supporting roles during disaster or emergency operations, and agencies with significant roles in post-disaster recovery have mission-critical needs to maintain network availability during disasters or emergencies.

It is essential that service be restored as soon as possible, and the services most critical to State operations remain operational during efforts to achieve full service recovery.

Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_

**5.4 OTHER SERVICES****5.4.1 HOURLY RATES FOR SERVICES**

The hourly classifications of hours worked for services described in this section will be as follows:

1. Regular Hours – Hours worked between 8:00AM and 4:59PM, Monday through Friday.
2. Overtime Hours – Hours worked between 5:00PM and 7:59AM, Monday through Friday and all day Saturday.
3. Sunday and Holiday Hours – Any hours worked on Sunday or State of California holidays.

**5.4.2 EXTENDED DEMARCATION WIRING SERVICES**

The Contractor shall provide Extended Demarcation (Extended Demarc) wiring to support the services covered by this IFB for all Customer occupied buildings where services under this Contract are being offered. Extended Demarc wiring includes wiring and cable related activities required to extend the service demarcation point to the Customer defined termination location or cross-connect point from the Contractor's Minimum Point of Entry (MPOE).

Extended Demarc wiring shall include all necessary hardware including wire and/or cable, connectors, jumpers, patch panels, minor materials and jacks. Extended Demarc wiring shall also include all necessary labor required to complete the provisioning of service including installation, testing, trouble shooting, labeling and documentation.

Extended Demarc wiring is limited to the following:

1. Installation of cabling for extending services from the MPOE location to the Customer's point of utilization;
2. Installation of cross-connects or rearrangement of existing jumpers;

---

 Volume 2: Category 5 – Managed Internet Services
 

---

3. Identification and testing of existing cabling beyond the MPOE to the Customer's equipment location; or,
4. Testing, trouble shooting, labeling and completing documentation.

The Contractor shall provide installations in accordance with the timeframes identified for the services that this cabling will support, and shall be subject to the SLAs detailed in Section 5.5.8.8 (Provisioning SLAs) associated with that service.

The Contractor shall not be required to complete Extended Demarc wiring from the MPOE to the extended Demarc location if:

1. The wire/cable pathway is blocked and cannot be cleared in less than 20 minutes or if the Contractor would cause damage to the Customer site or existing cabling in clearing the pathway;
2. The wire/cable pathway is in an asbestos environment or other environment hazardous to the Contractor's personnel, or where such work would be hazardous to the public or to the Customer's staff; or,
3. Written release of the responsibility to provide the Extended Demarc is provided by either the Customer or by CALNET 3 CMO.

Bidder shall provide a price in the Cost Worksheets for all labor and materials required for Extended Demarc wiring necessary to complete the provisioning of one (1) Demarc extension as described above. Bidder shall provide one (1) price for each media identified.

The Contractor shall install wiring according to industry standards and cabling recommendations published in the State Telecommunications Management Manual (STMM), Facilities Management Chapter, and Uniform Building Cabling/Wiring current at the time of this IFB and as periodically updated by CALNET 3 CMO. Additionally, the Contractor shall install and maintain all wiring in accordance with all applicable EIA/TIA, BICSI, and ITU-T recommended standards current at the time of installation or maintenance.

The Contractor shall provide extended Demarcation Services limited to one (1) occurrence or installation for the specific telecommunications service the cabling is meant to support and must be ordered in conjunction with the service being provisioned. All other cabling will be the responsibility of the Customer and will be acquired through other procurement vehicles.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

The Contractor shall offer the wiring services for extended demarcation detailed in Table 5.4.2.a.

This facility is from the Customers MPOE to the point of utilization, up to 1000 feet in the customers provided conduit or wiring space as defined in 4.1.4.2. Work shall conform to the State Telecommunications Management Manual Facilities Management Chapter, Uniform Building Cabling/Wiring standards.</i><br><br><i>This element is for such services performed anytime on Sunday or State of California holidays.</i> |   |  |                          |   |                             |

The Contractor may offer additional Unsolicited extended demarcation wiring services in Table 5.4.2.b.

**5.4.3 SERVICES RELATED HOURLY SUPPORT**

The Contractor shall provide labor for the diagnosis and/or repair of services offered in this Category and all costs for repair are the responsibility of the service provider unless it is specifically determined that the cause of service failure is outside the scope of the Contractor's responsibilities. Work performed under this Section 5.4.3 is authorized only for situations where the Contractor has dispatched personnel to diagnose a service problem that is discovered to be caused by factors outside the responsibility of the Contractor or no trouble is found.

In Cost Worksheet 5.4.3, the Contractor shall provide a fixed hourly rate schedule for the labor classifications required to diagnose and/or repair the contracted services. The rates identified shall only be used for the diagnosis and/or repair of contracted services and no materials shall be included in the rates. The total amount of labor hours permitted to be performed is ten (10) hours per dispatch/occurrence.

Bidder understands the Requirement and shall meet or exceed it? Yes   X    
 No \_\_\_\_\_

The Contractor shall offer emergency restoration services as detailed in Table 5.4.3.

**Table 5.4.3 Services Related Hourly Support**

|   | Labor Classification Name                                       | Classification Description  | Bidder Meets or Exceeds? |   | Bidder's Product Identifier |

## 5.5 SERVICE LEVEL AGREEMENTS (SLA)

The Contractor shall provide Service Level Agreements (SLAs) as defined below. The intent of this section is to provide Customers, CALNET 3 CMO and the Contractor with requirements that define and assist in the management of the SLAs. This section includes the SLA formats, general requirements, stop clock conditions, and the Technical SLAs for the services identified in this solicitation.

### 5.5.1 SERVICE LEVEL AGREEMENT FORMAT

The Contractor shall adhere to the following format and include the content as described below for each Technical SLA added by the Contractor throughout the Term of the Contract:

1. SLA Name - Each SLA Name must be unique;
2. Definition - Describes what performance metric will be measured;
3. Measurements Process - Provides instructions how the Contractor will continuously monitor and measure SLA performance to ensure compliance. The Contractor shall provide details describing how and what will be measured. Details shall include source of data and define the points of measurement within the system, application, or network;
4. Service(s) - All applicable Categories or Subcategories will be listed in each SLA;
5. Objective(s) – Defines the SLA performance goal/parameters; and,
6. Rights and Remedies
  - a. Per Occurrence: Rights and remedies are paid on a per event basis during the bill cycle; and,
  - b. Monthly Aggregated Measurements: Rights and remedies are paid once during the bill cycle based on an aggregate of events over a defined period of time.

The Contractor shall proactively apply an invoice credit or refund when an SLA objective is not met. CALNET SLA Rights and Remedies do not require the Customer to submit a request for credit or refund.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X*  
*No \_\_\_\_\_*

### 5.5.2 TECHNICAL REQUIREMENTS VERSUS SLA OBJECTIVES

Sections 5.2 (Managed Internet Services), 5.2.7 (Network Disaster/Operational Recovery) and 5.4 (Other Services) define the technical requirements for each service. These requirements are the minimum parameters each Bidder must meet in order to qualify for Contract award. Upon Contract award the committed technical requirements will be maintained throughout the remainder of the Contract.

Committed SLA objectives (Section 5.5) are minimum parameters which the Contractor shall be held accountable for all rights and remedies throughout Contract Term.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No\_\_\_\_\_*

### 5.5.3 **TWO METHODS OF OUTAGE REPORTING: CUSTOMER OR CONTRACTOR**

There are two (2) methods in which CALNET 3 service failures or quality of service issues may be reported and Contractor trouble tickets opened: Customer reported or Contractor reported.

The first method of outage reporting results from a Customer reporting service trouble to the Contractor's Customer Service Center via phone call or opening of a trouble ticket using the on-line Trouble Ticket Reporting Tool (IFB STPD 12-001-B Business Requirements Section B.9.4).

The second method of outage reporting occurs when the Contractor opens a trouble ticket as a result of network/system alarm or other method of service failure identification. In each instance the Contractor shall open a trouble ticket using the Trouble Ticket Reporting Tool (IFB STPD 12-001-B Business Requirements Section B.9.4) and monitor and report to Customer until service is restored.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No\_\_\_\_\_*

### 5.5.4 **BIDDER RESPONSE TO SERVICE LEVEL AGREEMENTS**

Many of the Service Level Agreements described below include multiple objective levels – Basic, Standard and Premier. Bidders shall indicate one (1) specific objective level they are committing to for each service in space provided in the "Objective" section of each SLA description.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No\_\_\_\_\_*

### 5.5.5 **CONTRACTOR SLA MANAGEMENT PLAN**

Within 90 calendar days of Contract award, the Contractor shall provide CALNET 3 CMO with a detailed SLA Management Plan that describes how the Contractor will manage the Technical SLAs for services in this IFB. The SLA Management plan shall provide processes and procedures to be implemented by the Contractor. The SLA Management Plan shall define the following:

1. Contractor SLA Manager and supporting staff responsibilities;

2. Contractor's process for measuring objectives for each SLA. The process shall explain how the Contractor will continuously monitor and measure SLA performance to ensure compliance. The Contractor shall provide details describing how and what will be measured. Details should include source of data and define the points of measurement within the system, application, or network;
3. Creation and delivery of SLA Reports (IFB STPD 12-001-B Business Requirements Section B.9.5). The Contractor shall include a sample report in accordance with IFB-B Business Requirements Section B.9.5 (SLA Reports) for the following: SLA Service Performance Report (Section IFB STPD 12-001-B Business Requirements Section B.9.5.1), SLA Provisioning Report (Section IFB STPD 12-001-B Business Requirements Section B.9.5.2), and SLA Catastrophic Outage Reports (Section IFB STPD 12-001-B Business Requirements Section B.9.5.3). The Contractor shall commit to a monthly due date. The reports shall be provided to the CALNET 3 CMO via the Private Oversight Website (IFB STPD 12-001-B Business Requirements Section B.9.2);
4. SLA invoicing credit and refund process;
5. Contractor SLA problem resolution process for SLA management and SLA reporting. The Contractor shall provide a separate process for Customers and CALNET 3 CMO; and,
6. Contractor SLA Manager to manage all SLA compliance and reporting. The Contractor shall include SLA Manager contact information for SLA inquiries and issue resolution for Customer and CALNET 3 CMO.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

#### **5.5.6 TECHNICAL SLA GENERAL REQUIREMENTS**

The Contractor shall adhere to the following general requirements which apply to all CALNET 3 Technical SLAs (Section 5.5.8):

1. With the exception of the Provisioning SLA, the total SLA rights and remedies for any given month shall not exceed the sum of 100 percent of the Total Monthly Recurring Charges (TMRC). Services with usage charges shall apply the Average Daily Usage Charge (ADUC) in addition to any applicable TMRC rights and remedies;
2. If a circuit or service fails to meet one (1) or more of the performance objectives, only the SLA with the largest monthly Rights and Remedies will be credited to the Customer, per event;
3. The Contractor shall apply CALNET 3 SLAs and remedies for services provided by Subcontractors and/or Affiliates;

Volume 2: Category 5 – Managed Internet Services

---

4. The Definition, Measurement Process, Objectives, and Rights and Remedies shall apply to all services identified in each SLA. If a Category or Subcategory is listed in the SLA, then all services under that Category or Subcategory are covered under the SLA. Exceptions must be otherwise stated in the SLA;
5. TMRC rights and remedies shall include the service, option(s), and feature(s) charges;
6. The Contractor shall proactively and continuously monitor and measure all Technical SLA objectives;
7. The Contractor shall proactively credit all rights and remedies to the Customer within 60 calendar days of the trouble resolution date on the trouble ticket or within 60 calendar days of the Due Date on the Service Request for the Provisioning SLA;
8. To the extent that Contractor offers additional SLAs, or SLAs with more advantageous rights and/or remedies for same or similar services offered through tariffs, online service guides, or other similarly situated government contracts (Federal, State, County, City), the State will be entitled to the same rights and/or remedies therein. The Contractor shall present the SLAs to CALNET 3 CMO for possible inclusion via amendments;
9. The Contractor shall apply CALNET 3 SLAs and remedies to services provided in geographic areas which the Bidder has committed to provide service. ;
10. The election by CALNET 3 CMO of any SLA remedy covered by this Contract shall not exclude or limit CALNET 3 CMO's or any Customer's rights and remedies otherwise available within the Contract or at law or equity;
11. The Contractor shall apply rights and remedies when a service fails to meet the SLA objective even when backup or protected services provide Customer with continuation of services;
12. The Contractor shall act as the single point of contact in coordinating all entities to meet the State's needs for provisioning, maintenance, restoration and resolution of service issues or that of their Subcontractors, Affiliates or resellers under this Contract;
13. The Customer Escalation Process (IFB STPD 12-001-B Business Requirements Section B.3.4.2) and/or the CALNET 3 CMO Escalation Process (IFB STPD 12-001-B Business Requirements Section B.3.4.1) shall be considered an additional right and remedy if the Contractor fails to resolve service issues within the SLA objective(s);
14. Trouble reporting and restoration shall be provided 24x365 for CALNET 3 services;
15. SLAs apply 24x365 unless SLA specifies an exception;

- 16. Contractor invoices shall clearly cross reference the SLA credit to the service Circuit ID in accordance with IFB STPD 12-001-B Business Requirements Section B.5.1 (Billing and Invoicing Requirements, #14);
- 17. The Contractor shall provide a CALNET 3 SLA Manager responsible for CALNET 3 SLA compliance. The SLA Manager shall attend regular meetings and be available upon request to address CALNET 3 CMO SLA oversight, report issues, and problem resolution concerns. The CALNET 3 SLA Manager shall also coordinate SLA support for Customer SLA inquiries and issue resolution;
- 18. The Contractor shall provide Customer and CALNET 3 CMO support for SLA inquiries and issue resolution; and,
- 19. Any SLAs and remedies negotiated between Contractor and third party service provider in territories closed to competition shall be passed through to the CALNET 3 Customer.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.5.7 TROUBLE TICKET STOP CLOCK CONDITIONS**

The following conditions shall be allowed to stop the trouble ticket Outage Duration for CALNET 3 Contractor trouble tickets. The Contractor shall document the trouble ticket Outage Duration using the Stop Clock Condition (SCC) listed in Table 5.5.7 and include start and stop time stamps in the Contractor’s Trouble Ticket Reporting Tool (IFB STPD 12-001-B Business Requirements Section B.9.4) for each application of a SCC.

Note: The Glossary (SOW Appendix A) defines term “End-User” as the “individual within an Entity that is utilizing the feature or service provided under the Contract.”

Stop Clock Conditions are limited to the conditions listed in Table 5.5.7.

**Table 5.5.7 –Stop Clock Conditions (SCC)**

| # | Stop Clock Condition (SCC) | SCC Definition  |
|---|----------------------------|---|
| 1 | END-USER REQUEST           | Periods when a restoration or testing effort is delayed at the specific request of the End-User. The SCC shall exist during the period the Contractor was delayed, provided that the End-User’s request is documented and time stamped in the Contractor’s trouble ticket or Service Request system and shows efforts are made to contact the End-User during the applicable Stop Clock period. |

**Table 5.5.7 –Stop Clock Conditions (SCC)**

| # | Stop Clock Condition (SCC)    | SCC Definition  |
|---|-------------------------------|---|
| 2 | <b>OBSERVATION</b>            | Time after a service has been restored but End-User request ticket is kept open for observation. If the service is later determined by the End-User to not have been restored, the Stop Clock shall continue until the time the End-User notifies the Contractor that the Service has not been restored.  |
| 3 | <b>END-USER NOT AVAILABLE</b> | Time after a service has been restored but End-User is not available to verify that the Service is working. If the service is later determined by the End-User to not have been restored, the Stop Clock shall apply only for the time period between Contractor's reasonable attempt to notify the End-User that Contractor believes the service has been restored and the time the End-User notifies the Contractor that the Service has not been restored. |
| 4 | <b>WIRING</b>                 | Restoration cannot be achieved because the problem has been isolated to wiring that is not maintained by Contractor or any of its Subcontractors or Affiliates. If it is later determined the wiring is not the cause of failure, the SCC shall not apply.  |
| 5 | <b>POWER</b>                  | Trouble caused by a power problem outside of the responsibility of the Contractor.  |
| 6 | <b>FACILITIES</b>             | Lack of building entrance Facilities or conduit structure that are the End-User's responsibility to provide.  |

**Table 5.5.7 –Stop Clock Conditions (SCC)**

| #  | Stop Clock Condition (SCC) | SCC Definition  |
|----|----------------------------|---|
| 7  | <b>ACCESS</b>              | <p>Limited access or contact with End-User provided the Contractor documents in the trouble ticket several efforts to contact End-User for the following:</p> <ul style="list-style-type: none"> <li>a. Access necessary to correct the problem is not available because access has not been arranged by site contact or End-User representative;</li> <li>b. Site contact refuses access to technician who displays proper identification;</li> <li>c. Customer provides incorrect site contact information which prevents access, provided that Contractor takes reasonable steps to notify End-User of the improper contact information and takes steps to obtain the correct information; or,</li> <li>d. Site has limited hours of business that directly impacts the Contractor's ability to resolve the problem.</li> </ul> <p>If it is determined later that the cause of the problem was not at the site in question, then the Access SCC shall not apply.</p> |
| 8  | <b>STAFF</b>               | <p>Any problem or delay to the extent caused by End-User's staff that prevents or delays Contractor's resolution of the problem. In such event, Contractor shall make a timely request to End-User staff to correct the problem or delay and document in trouble ticket.</p>  |
| 9  | <b>APPLICATION</b>         | <p>End-User software applications that interfere with repair of the trouble.</p>  |
| 10 | <b>CPE</b>                 | <p>Repair/replacement of Customer Premise Equipment (CPE) not provided by Contractor if the problem has been isolated to the CPE. If determined later that the CPE was not the cause of the service outage, the CPE SCC will not apply.</p>   |
| 11 | <b>NO RESPONSE</b>         | <p>Failure of the trouble ticket originator or responsible End-User to return a call from Contractor's technician for on-line close-out of trouble tickets after the Service has been restored as long as Contractor can provide documentation in the trouble ticket substantiating the communication from Contractor's technician.</p>   |

**Table 5.5.7 –Stop Clock Conditions (SCC)**

| #  | Stop Clock Condition (SCC) | SCC Definition  |
|----|----------------------------|---|
| 12 | <b>MAINTENANCE</b>         | An outage directly related to any properly performed scheduled maintenance or upgrade scheduled for CALNET 3 service. Any such stop clock condition shall not extend beyond the scheduled period of the maintenance or upgrade. SLAs shall apply for any maintenance caused outage beyond the scheduled maintenance period. Outages occurring during a scheduled maintenance or upgrade period and not caused by the scheduled maintenance shall not be subject to the Maintenance SCC. |
| 13 | <b>THIRD PARTY</b>         | Any problem or delay caused by a third party not under the control of Contractor, not preventable by Contractor, including, at a minimum, cable cuts not caused by the Contractor. Contractor's Subcontractors and Affiliates shall be deemed to be under the control of Contractor with respect to the equipment, services, or Facilities to be provided under this Contract.  |
| 14 | <b>FORCE MAJEURE</b>       | Force Majeure events, as defined in the PMAC General Provisions - Telecommunications, Section 28 (Force Majeure).   |

*Bidder understands the Requirement and shall meet or exceed it? Yes*   X  

*No* \_\_\_\_\_

**5.5.8 TECHNICAL SERVICE LEVEL AGREEMENTS**

The Contractor shall provide and manage the following Technical SLAs.

**5.5.8.1 Availability (M-S)**

**5.5.8.1 Availability (M-S)**

**SLA Name:** Availability

**Definition:** The percentage of time a CALNET 3 service is fully functional and available for use each calendar month.

**Measurement Process:** The monthly Availability Percentage shall be based on the accumulative total of all Unavailable Time derived from all trouble tickets closed, for the affected service (Per Circuit ID), per calendar month. The monthly Availability Percentage equals the Scheduled Uptime per month less Unavailable Time per month divided by Scheduled Uptime per month multiplied by 100. Scheduled Uptime is 24 x number of days in the month. All Unavailable Time applied to other SLAs, which results in a remedy, will be excluded from the monthly accumulated total.

**Services:**

Managed Internet Service

**Objective(s):**

The objective shall be based on the network side interface type:

| SLA Objective Table 1 – Required               |           |              |             |   |
|--|-----------|--------------|-------------|---|
| Network Side Interface                         | Basic (B) | Standard (S) | Premier (P) | Bidder's Objective Commitment (B, S or P) |
| T1/FT1   | ≥ 99.2%   | ≥ 99.5%      | ≥ 99.8%     | <b>S</b>                                  |
| T3/FT3   | ≥ 99.7%   | ≥ 99.8%      | ≥ 99.9%     | <b>S</b>                                  |
| OCX/OCXc                                       | ≥ 99.7%   | ≥ 99.8%      | ≥ 99.9%     | <b>S</b>                                  |
| Ethernet 1 Mbps up to 1 GbE (Gigabit Ethernet) | ≥ 99.2%   | ≥ 99.5%      | ≥ 99.8%     | <b>S</b>                                  |
| Ethernet 10 GbE                                | ≥ 99.2%   | ≥ 99.5%      | ≥ 99.8%     | <b>S</b>                                  |

**5.5.8.1 Availability (M-S)**

**Objective(s), continued:**

With the exception of XDSL, Bidder shall identify any additional Contractor identified network side interfaces not listed in the Table 1 above for InFRa and InFRaM services. Bidder shall provide an objective commitment percentage for each additional network side interface which must be above 99.2%:

| SLA Objective Table 2 – Additional |                                   |                                   |
|------------------------------------|-----------------------------------|-----------------------------------|
|                                    | Additional Network Side Interface | Bidder's Objective Commitment (%) |
| 1                                  |                                   |                                   |
| 2                                  |                                   |                                   |
| 3                                  |                                   |                                   |
| 4                                  |                                   |                                   |
| 5                                  |                                   |                                   |
| 6                                  |                                   |                                   |
| 7                                  |                                   |                                   |
| 8                                  |                                   |                                   |
| 9                                  |                                   |                                   |
| 10                                 |                                   |                                   |

**Per Occurrence:** N/A

**Monthly Aggregated Measurements:**

First month the service fails to meet the committed SLA objective shall result in a 15 percent rebate of the TMRC and two (2) Business Days of the ADUC, when usage applies.

The second consecutive month the service fails to meet the committed SLA objective shall result in a 30 percent rebate of TMRC and two (2) Business Days of the ADUC, when usage applies.

Each additional consecutive month the service fails to meet the committed SLA objective shall result in a 50 percent rebate of the TMRC and two (2) Business Days of the ADUC, when usage applies.

**5.5.8.3 Catastrophic Outage 2 (CAT 2) (M-S)**

|   |  |                     |                    |  |
|---|--|---------------------|--------------------|--|
| <b>5.5.8.3 Catastrophic Outage 2 (CAT 2) (M-S)</b>  |  |                     |                    |  |
| <b>SLA Name:</b> Catastrophic Outage 2 (CAT 2)  |  |                     |                    |  |
| <b>Definition:</b> A total failure of a service type in a central office (or equivalent facility), other than access, that results in a CALNET 3 service failure. Or, a backbone failure or failure of any part of the equipment associated with the backbone that causes a CALNET 3 service failure.   |  |                     |                    |  |
| <b>Measurement Process:</b> The Outage Duration begins when a network alarm is received by the Contractor from an outage-causing event or the opening of a trouble ticket by the Customer or Contractor, whichever occurs first. Upon notification from the Customer or network alarm, the Contractor shall compile a list for each End-User service affected by a common cause for tracking and reporting of the SLA rights and remedies. Outage Duration shall be measured on a per-End-User service (Circuit ID) basis from information recorded from the network equipment/system or Customer reported trouble ticket. Each End-User service (Circuit ID) is deemed out of service from the first notification until the Contractor determines the End-User service is restored. Any End-User service reported by the End-User/Customer as not having been restored shall have the outage time adjusted to the actual restoration time. |  |                     |                    |  |

**5.5.8.6 Managed Service Proactive Notification (M-S)**

|  |   |
|--|---|
| <b>5.5.8.6 Managed Service Proactive Notification (M-S)</b>  |   |
| <b>SLA Name:</b> Managed Service Proactive Notification  |   |
| <p><b>Definition:</b> The proactive outage notification provides credits if the Contractor fails to open a trouble ticket and notify Customer of an Outage for a managed router service. Notification to the Customer shall occur through means agreed to by Contractor and CALNET 3 CMO.</p> <p>An Outage is defined as an unscheduled period in which the managed router service is interrupted and unavailable for use by Customer for 60 continuous seconds or more than 60 cumulative seconds within a 15-minute period measured by the Contractor.</p>   |   |
| <p><b>Measurement Process:</b> The Outage Duration start shall be determined by the first Contractor network alarm resulting from the outage-causing event or the opening of a trouble ticket by the Customer, whichever occurs first. The Contractor has fifteen (15) minutes (Notification Period) to notify the Customer from the start point of the first network alarm. The Contractor is in compliance with the proactive outage notification SLA if the Customer opened the trouble ticket prior to the network alarm or Customer is notified by the Contractor within the Notification Period.</p> |   |
| <b>Service(s):</b>   |   |
| Managed Internet Services with Managed Router  |   |
| <b>Objective (s):</b> 15 Minutes   |   |
| <b>Rights and Remedies</b>   | <b>Per Occurrence:</b> Customer will receive a credit equal to ten percent of the TMRC for Managed Internet Service (Circuit ID) that was impacted during an outage if the Customer was not proactively notified within the notification period |

**5.5.8.7 Notification**

|   |   |
|---|---|
| <b>5.5.8.7 Notification</b>   |   |
| <b>SLA Name:</b> Notification   |   |
| <b>Definition:</b> The Contractor notification to CALNET 3 CMO and designated stakeholders in the event of a CAT 2 or CAT 3 failure, Contractor, Subcontractor or Affiliate network event, terrorist activity, threat of natural disaster, or actual natural disaster which results in a significant loss of telecommunication services to CALNET 3 End-Users or has the potential to impact services in a general or statewide area. The State understands initial information regarding the nature of the outage may be limited.  |   |
| <b>Measurement Process:</b> The Contractor shall adhere to the Network Outage Response requirements (IFB STPD 12-001-B Business Requirements Section B.3.3) and notify the CALNET 3 CMO and designated stakeholders for all CAT 2 and CAT 3 Outages or for network outages resulting in a significant loss of service. Notification objectives will be based on the start time of the outage failure determined by the opening of a trouble ticket or network alarm, whichever occurs first. For events based on information such as terrorist activity or natural disaster, the Contractor shall notify CALNET 3 CMO and designated stakeholder when information is available. |   |
| <b>Service(s):</b> All Services   |   |
| <b>Objective (s):</b> Within 60 minutes of the above mentioned failures' start time, the Contractor shall notify CALNET 3 CMO and designated stakeholders using a method defined in IFB STPD 12-001-B Business Requirements Section B.3.3 (Network Outage Response).<br>At 60 minute intervals, updates shall be given on the above mentioned failures via the method defined in Section IFB STPD 12-001-B Business Requirements Section B.3.3 (Network Outage Response).<br>This objective is the same for Basic, Standard and Premier commitments.  |   |
| <b>Rights and Remedies</b>  | <b>Per Occurrence:</b> Senior Management Escalation |
|   | <b>Monthly Aggregated Measurements:</b> N/A         |

**5.5.8.8 Provisioning (M-S)**

| <b>5.5.8.8 Provisioning (M-S)</b>   |   |                                    |
|---|---|------------------------------------|
| <b>SLA Name:</b> Provisioning   |   |                                    |
| <p><b>Definition:</b> Provisioning shall include new services, moves, adds and changes completed by the Contractor on or before the due dates. The Provisioning SLA shall be based on committed installation intervals established in this SLA or due dates negotiated between Customer and Contractor documented on the Contractor's order confirmation notification or Contracted Service Project Work SOW in accordance with IFB STPD 12-001 Business Requirements Section B.2.5.4 #7 (Provisioning and Implementation). The Contractor shall meet the committed interval dates or due date negotiated with the Customer. If the Customer agrees to a negotiated due date, the negotiated due date supersedes the committed interval. At the Customer's discretion, if the scope of the Service Request(s) meets the Coordinated or Managed Project criteria, negotiated due dates will be established and documented in the Project Schedule per IFB STPD 12-001-B Business Requirements Section B.6 (Contracted Service Project Work).</p> <p>Provisioning SLAs have two (2) objectives:</p> <p>Objective 1: Individual Service Request; and</p> <p>Objective 2: Successful Install Monthly Percentage by Service Type.</p> <p>Note: Provisioning timelines include extended demarcation wiring, when appropriate.</p> |   |                                    |
| <p><b>Measurement Process:</b></p> <p><u>Objective 1: Individual Service Request:</u> Install intervals are based on the committed installation intervals established in this SLA or due dates negotiated between Customer and Contractor. This objective requires the Contractor to meet the due date for each individual Service Request.</p> <p><u>Objective 2: Successful Install Monthly Percentage per service Type:</u> The Contractor shall sum all individual Service Requests per service, as listed below, meeting the objective in the measurement period (per month) and divide by the sum of all individual Service Requests due per service in the measurement period and multiply by 100 to equal the percentage of Service Requests installed on time. The Contractor must meet or exceed the objective below in order to avoid the rights and remedies.</p>   |   |                                    |
| <b>Service (Features must be installed in conjunction with the service except when listed below)</b>  | <b>Committed Interval Calendar Days</b> | <b>Coordinated/Managed Project</b> |

**5.5.8.10 Unsolicited Service Enhancement SLAs**

All unsolicited service enhancements shall be considered a feature of the service, and therefore shall be included as such under the SLAs as defined in this Section.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X    
No \_\_\_\_\_*

**5.5.8.11 Proposed Unsolicited Offerings**

The Contractor shall provide SLAs as defined in SLA Section 5.5 for each unsolicited offering determined by the CALNET 3 CMO not to be a feature of a service or a component of an unbundled service identified in the technical requirements. SLA tables shall be amended after Contract award to include all new unsolicited services.

*Bidder understands the Requirement and shall meet or exceed it? Yes   X

Category 5 – Managed Internet Services  
SOW Catalog A

**5.2.4.1 Internet Flat Rate Service (InFRa)**

**Contractor’s Summary description of service:**

Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone.

The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity is 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry. We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces. We also provide other Internet services and features such as: Distributed Denial of Service (DDoS) Mitigation, Firewall (Cloud), and IP V6 support.

**Geographic Availability:**

Integra's Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:

|                |                |                 |
|----------------|----------------|-----------------|
| Citrus Heights | Palo Alto      | San Francisco   |
| Cotati         | Petaluma       | San Jose        |
| Elk Grove      | Pleasanton     | San Rafael      |
| Folsom         | Rancho Cordova | Santa Clara     |
| Milpitas       | Rohnert Park   | Santa Rosa      |
| Oakland        | Sacramento     | Sunnyvale       |
|                |                | West Sacramento |

**Service Limitations and Restrictions**

Integra’s Managed Internet Services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

SOW Catalog A

**5.2.4.2 Internet Flat Rate with Managed Router Service (InFRaM)**

**Contractor’s Summary description of service:**

Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone.

The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity is 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry.

We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces.

We also provide other Internet services and features such as: Distributed Denial of Service (DDoS) Mitigation, Firewall (Cloud) and IP V6 support.

**Geographic Availability:**

Integra’s Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:

|                |                |                 |
|----------------|----------------|-----------------|
| Citrus Heights | Palo Alto      | San Francisco   |
| Cotati         | Petaluma       | San Jose        |
| Elk Grove      | Pleasanton     | San Rafael      |
| Folsom         | Rancho Cordova | Santa Clara     |
| Milpitas       | Rohnert Park   | Santa Rosa      |
| Oakland        | Sacramento     | Sunnyvale       |
|                |                | West Sacramento |

**Service Limitations and Restrictions**

Integra’s Managed Internet Services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

**5.2.5.1 Internet Sustained Bandwidth Ethernet Transport Service (InSBET)**

**Contractor’s Summary description of service:**

Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone. The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity is 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry. We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces. We also provide other Internet services and features such as: Distributed Denial of Service (DDoS) Mitigation, Firewall (Cloud) and IP V6 support.

**Geographic Availability:**

Integra’s Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:

|                |                |                 |
|----------------|----------------|-----------------|
| Citrus Heights | Palo Alto      | San Francisco   |
| Cotati         | Petaluma       | San Jose        |
| Elk Grove      | Pleasanton     | San Rafael      |
| Folsom         | Rancho Cordova | Santa Clara     |
| Milpitas       | Rohnert Park   | Santa Rosa      |
| Oakland        | Sacramento     | Sunnyvale       |
|                |                | West Sacramento |

**Service Limitations and Restrictions**

Integra’s Managed Internet Services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

**5.2.5.2.b Internet Sustained Bandwidth Ethernet Port Service (InSBEP) Minimum Bandwidth Commitment and Incremental Usage Charge for InSBET 10G-Base-LSR 10,000 Mbps (to be provisioned with InSBET 10G-Base-LSR 10,000 Mbps Ethernet Transport)**

**Contractor’s Summary description of service:**

Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone.

The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity is 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry.

We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces.

We also provide other Internet services and features such as: Distributed Denial of Service (DDoS) Mitigation, Firewall (Cloud) and IP V6 support.

**Geographic Availability:**

Integra's Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:

|                |                |                 |
|----------------|----------------|-----------------|
| Citrus Heights | Palo Alto      | San Francisco   |
| Cotati         | Petaluma       | San Jose        |
| Elk Grove      | Pleasanton     | San Rafael      |
| Folsom         | Rancho Cordova | Santa Clara     |
| Milpitas       | Rohnert Park   | Santa Rosa      |
| Oakland        | Sacramento     | Sunnyvale       |
|                |                | West Sacramento |

**Service Limitations and Restrictions**

Integra’s Managed Internet Services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

| <p><b>Contractor’s Summary description of service:</b><br/>                 Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone.<br/>                 The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity to 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry.<br/>                 We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces.<br/>                 We also provide other Internet services and features such as: Distributed Denial of Service (DDoS) Mitigation, Firewall (Cloud) and IP V6 support.</p> |                |                 |                |           |               |        |          |          |           |            |            |        |                |             |          |              |            |         |            |           |  |  |                 |
| <p><b>Geographic Availability:</b><br/>                 Integra's Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:</p> <table border="0"> <tr> <td>Citrus Heights</td> <td>Palo Alto</td> <td>San Francisco</td> </tr> <tr> <td>Cotati</td> <td>Petaluma</td> <td>San Jose</td> </tr> <tr> <td>Elk Grove</td> <td>Pleasanton</td> <td>San Rafael</td> </tr> <tr> <td>Folsom</td> <td>Rancho Cordova</td> <td>Santa Clara</td> </tr> <tr> <td>Milpitas</td> <td>Rohnert Park</td> <td>Santa Rosa</td> </tr> <tr> <td>Oakland</td> <td>Sacramento</td> <td>Sunnyvale</td> </tr> <tr> <td></td> <td></td> <td>West Sacramento</td> </tr> </table>   |                |                 | Citrus Heights | Palo Alto | San Francisco | Cotati | Petaluma | San Jose | Elk Grove | Pleasanton | San Rafael | Folsom | Rancho Cordova | Santa Clara | Milpitas | Rohnert Park | Santa Rosa | Oakland | Sacramento | Sunnyvale |  |  | West Sacramento |

|   |                |                 |                |           |               |        |          |          |           |            |            |        |                |             |          |              |            |         |            |           |  |  |                 |
|---|----------------|-----------------|----------------|-----------|---------------|--------|----------|----------|-----------|------------|------------|--------|----------------|-------------|----------|--------------|------------|---------|------------|-----------|--|--|-----------------|
| <p><b>Contractor’s Summary description of service:</b><br/>                 Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone.<br/>                 The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity to 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry.<br/>                 We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces.<br/>                 We also provide other Internet services and features such as: Distributed Denial of Service (DDoS) Mitigation, Firewall (Cloud) and IP V6 support.</p> |                |                 |                |           |               |        |          |          |           |            |            |        |                |             |          |              |            |         |            |           |  |  |                 |
| <p><b>Geographic Availability:</b><br/>                 Integra's Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:</p> <table border="0"> <tr> <td>Citrus Heights</td> <td>Palo Alto</td> <td>San Francisco</td> </tr> <tr> <td>Cotati</td> <td>Petaluma</td> <td>San Jose</td> </tr> <tr> <td>Elk Grove</td> <td>Pleasanton</td> <td>San Rafael</td> </tr> <tr> <td>Folsom</td> <td>Rancho Cordova</td> <td>Santa Clara</td> </tr> <tr> <td>Milpitas</td> <td>Rohnert Park</td> <td>Santa Rosa</td> </tr> <tr> <td>Oakland</td> <td>Sacramento</td> <td>Sunnyvale</td> </tr> <tr> <td></td> <td></td> <td>West Sacramento</td> </tr> </table>   |                |                 | Citrus Heights | Palo Alto | San Francisco | Cotati | Petaluma | San Jose | Elk Grove | Pleasanton | San Rafael | Folsom | Rancho Cordova | Santa Clara | Milpitas | Rohnert Park | Santa Rosa | Oakland | Sacramento | Sunnyvale |  |  | West Sacramento |

**5.2.7.a Cloud Firewall Service**

**Contractor’s Summary description of service:**

Integra’s internet network is extensive and while nationwide it is focused on commercial and government customers in the Western United States. The entire network functions as a purpose built IP network with all elements interconnected and under one singular support and maintenance organization. This ensures that all elements are designed to provide the best possible performance. There are no third party networks within the core backbone. The backbone is totally redundant and fully peered as single autonomous system. The backbone capacity is 4 times larger than the traffic load that is placed on it. This provides performance levels that are some of the best in the industry. We offer internet services via many access types. Typically we provide 10/100/1000-base-T Ethernet RJ-48 jacks for all products up to 1 Gig. We can also provide fiber optic hand-offs for high bandwidth services for 100 meg and over and all 10 gig UNI interfaces. We also provide other Internet services and features such as: Firewall (Cloud), Distributed Denial of Service (DDoS) Mitigation, and IP V6 support.

**Geographic Availability:**

Integra's Managed Internet Services are available in the geographic areas described in Section 5.2.6 INTERNET SERVICE GEOGRAPHIC REQUIREMENTS as outlined in the SOW Technical Requirements document for Category 5 - Managed Internet Services, which consist of the following cities:

|                |                |                 |
|----------------|----------------|-----------------|
| Citrus Heights | Palo Alto      | San Francisco   |
| Cotati         | Petaluma       | San Jose        |
| Elk Grove      | Pleasanton     | San Rafael      |
| Folsom         | Rancho Cordova | Santa Clara     |
| Milpitas       | Rohnert Park   | Santa Rosa      |
| Oakland        | Sacramento     | Sunnyvale       |
|                |                | West Sacramento |

**Service Limitations and Restrictions**

Integra’s Managed Internet Services require a no-cost customer consultation, including assessing the specific network design requirements (i.e., usage, applications, service locations, site surveys, etc.), prior to finalizing a service order and implementation.

**Change Charge Applicability:**

Change Charges apply to modifications of existing services and features. Change Charges do not apply to disconnects.

**5.2.7.b DDoS Mitigation****Bidder's Product Description:**

*The DDoS Mitigation feature is used on your Integra-provided Managed Internet Service (MIS) as a network based feature for 1.544 Mbps through 10 Gbps MIS. The feature will help protect your network from Distributed Denial of Service attacks from the Internet. Once purchased, Integra will monitor your interface(s) and establish a shifting baseline of your normal network traffic. Establishing the complete baseline of your normal traffic requires 30 days, and is constantly updated. This baseline provides a fingerprint of your traffic before an attack occurs. This baseline is used to compare current traffic and aids in determining the appropriate mitigating response.*

*DDoS Mitigation from Integra is reactive in nature and is activated upon customer notification to our network operations center. The reactive feature keeps the customer in control of which traffic is allowed, and which is classified as a DDoS attack. The customer alone decides when they believe they are under a cyber-attack.*

*A mitigation event begins when Integra responds to the trouble ticket opened by the customer. Integra engineers will confirm that an attack is in progress, and Integra will reroute your traffic through our scrubbing center where your traffic will be filtered by sophisticated tools, leaving normal traffic flowing into your network. Once the attack has stopped, a normalization period begins – a period of 24 hours during which your traffic is monitored for normal activity. A mitigation event ends following the 24-hour normalization period if the attack has not re-started and if normal traffic is flowing.*

**Feature Details:**

- This is an optional feature. Integra will mitigate DDoS attacks only for Internet bandwidth purchased from Integra where a baseline has been established. The MIS and DDoS Mitigation bandwidth amounts must match.*
- Integra requires 30 days following the DDoS Mitigation feature installation to establish the customer's traffic baseline profile.*
- Integra requires a customer-provided list of potential IP target objects to establish the normal baseline traffic pattern. Integra will provide a form to complete.*
- The customer will need to open a trouble ticket with the Integra NOC when they suspect a DDoS attack is in progress.*
- Integra will respond to the customer trouble ticket within 15 minutes from 8:00 am-5:00 pm Monday through Friday Pacific time (excluding holidays) and within 30 minutes at all other times.*
- Once an attack is identified, customer traffic will be rerouted to the Integra scrubbing center only after customer approval is given.*
- When the attack subsides and the 24-hour normalization period is complete, customer traffic will be routed back to the normal traffic flow at a time agreed upon by both parties.*

**Pricing:** DDoS Mitigation has three distinct pricing elements:

- A single monthly recurring charge (MRC) applies to establish the baseline traffic patterns per bandwidth monitored, and for the mitigations per month a customer would like to include (options include: up to 5 mitigations per month, up to 10 mitigations per month, up to 15 mitigations per month, up to 20 mitigations per month, over 20 mitigations per month, unlimited mitigations per month, and 0 mitigations per month, where a customer purchases the "Baseline Only" option, and then pays for each mitigation as needed.)*
- Customers may increase the number of mitigations per month at any time. Customers may decrease the number of mitigations per month once per calendar quarter. Increases and decreases will result in a new MRC. No change charge applies to these changes.*
- If the number of mitigations exceeds the amount chosen by the customer in a given month, a per-mitigation charge will apply.*

| <p><b>5.4.2 Extended Demarcation Wiring Services</b></p> <p><b>Contractor’s Summary description of service:</b><br/>                 Extended Demarc wiring includes wiring and cable related activities required to extend the service demarcation point to the Customer defined termination location or cross-connect point from the Contractor’s Minimum Point of Entry (MPOE).<br/>                 Extended Demarc wiring shall include all necessary hardware including wire and/or cable, connectors, jumpers, patch panels, minor materials and jacks. Extended Demarc wiring shall also include all necessary labor required to complete the provisioning of service including installation, testing, trouble shooting, labeling and documentation.<br/>                 Extended Demarc wiring is limited to the following:<br/>                 1. Installation of cabling for extending services from the MPOE location to the Customer’s point of utilization;<br/>                 2. Installation of cross-connects or rearrangement of existing jumpers;<br/>                 3. Identification and testing of existing cabling beyond the MPOE to the Customer’s equipment location; or,<br/>                 4. Testing, trouble shooting, labeling and completing documentation.</p> |
| <p><b>Geographic Availability:</b><br/>                 Integra will provide Extended Demarcation (Extended Demarc) wiring to support the services covered by this contract for all Customer occupied buildings where services under this Contract are being offered.</p>   |
| <p><b>Service Limitations and Restrictions</b><br/>                 Integra’s Extended Demarcation Wiring Services require a no-cost customer consultation regarding specific wiring requirements prior to finalizing a service order and implementation.</p>   |
| <p><b>Change Charge Applicability:</b><br/>                 N/A</p>   |

**5.4.3 Services Related Hourly Support**

**Contractor's Summary description of service:**  
Work performed under this section is authorized only for situations where the Contractor has dispatched personnel to diagnose a service problem that is discovered to be caused by factors outside the responsibility of the Contractor or no trouble is found.

**Geographic Availability:**  
Integra will provide labor for the diagnosis and/or repair of services covered by this contract for all Customer occupied buildings where services under this Contract are being offered.

**Service Limitations and Restrictions**  
Integra's Labor Services require a no-cost customer consultation regarding specific support requirements prior to finalizing a service order and implementation.

**Change Charge Applicability:**  
N/A
